Ability to Remain Functional in Emergencies Certification
§54.313(a)(6)

ETCs must demonstrate that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to re-route traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations.

Re: Inland Cellular LLC (f/k/a Washington RSA No. 8 Limited Partnership) (SAC 479007) ("Company")

The Company is able to remain functional in emergencies as set forth in Commission Order No. 29841 and in 47 C.F.R. §54.201(a)(2), as such standards relate to functionality of wireless carriers in emergency situations. The Company maintains back-up power to ensure functionality without an external power source in the forms of auxiliary generators and batteries in its central office and auxiliary generators and/or batteries at its cellular tower locations. The Company also constantly monitors traffic on its tower locations and its switching capability is more than adequate to manage the traffic of its subscribers.

The Company is able to re-route traffic around damaged facilities. All Inland Cellular subscribers are defaulted to roam on competitors should an Inland Cellular signal not be obtained.

Inland Cellular's Tribal Engagement

Inland Cellular (IC) serves the Nez Perce Tribe (NPT) Reservation and surrounding rural communities in north-central Idaho, and we have a long-standing relationship to enhance voice and data services to these areas. Inland regularly coordinates with the NPT Department of Technology Services to assess buildout needs and challenges, including opportunities to apply for funding to enhance services, such as Mobility Funds. Inland and the NPT successfully implemented its stated partnership with the NPT BiP/BTOP applications (see attached Memorandum of Understanding dated on or about December 17, 2012, between IC and NPT) and we continue to share co-location facilities at discounted rates, advertise services in local communities, provide traffic backhaul to each other and continue to identify future sites and business opportunities to bring new and enhanced services to the Nez Perce Tribe.

Inland implements its delegated federal trust responsibility from the FCC and uses the FCC's TCNS portal. When requested by a tribe, Inland will consult directly with the interested tribe. When the Nez Perce Tribe requests consultation, Inland works directly with representatives of the Nez Perce Tribal Executive Committee, the Tribal Historic Preservation Officer, and the Nez Perce Cultural Resources Program, along with the State Historic Preservation Officer as applicable, to ensure compliance with the environmental and cultural preservation review process. Inland contracts with the Nez Perce Tribe to conduct archaeological surveys and traditional cultural property studies on the Nez Perce Tribe Reservation and other lands of importance to the Nez Perce Tribe. As technologies and data speeds advance, rural communities without access to broadband and other fixed and mobile wireless solutions will be further disadvantaged, and our partnership with the Nez Perce Tribe multiplies the return on our efforts to close that gap. The goal is to leverage each other's strengths to close mobile broadband gaps on NPT Reservation lands. In addition, IC executed a Special Services Contract for partnering with NPT to build two new towers to be used for mobile and broadband services on NPT Reservation lands.

Inland Cellular continues to lease tower space and data transport from and to NPT, and keep in regular touch with NPT to discuss future partnerships.

In addition, we work directly with the Tribe to identify customers who are eligible for Tribal Lifeline or Tribal ACP discounts.
