TARIFF FORMAT

- A. Page Numbering** - Sheet numbers appear in the upper right corner of the Sheet. Sheets are numbered sequentially. However, occasionally, when a new Sheet is added between Sheets already in effect, a decimal is added. For example, a new Sheet added between Sheets 14 and 15 would be 14.1.
- B. Numbers** - Revision numbers also appear in the upper right corner of each Sheet. These numbers are used to determine the most current Sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in its Tariff approval process, the most current Sheet number on file with the Commission is not always the Sheet in effect. Consult the Check Sheet for the Sheet currently in effect.
- C. Paragraph Numbering Sequence** – There are five levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
- D. Check Sheets** - When a Tariff filing is made with the Commission, an updated Check Sheet accompanies the Tariff filing. The Check Sheet lists the Sheets contained in the Tariff with a cross-reference to the current revision number. When new Sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this Sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Sheets). The Tariff Authorized User should refer to the latest Check Sheet to find if a particular Sheet is the most current on file with the Commission.

APPLICATION OF TARIFF

- A.** This Tariff schedule sets forth the Service offerings, rates, terms and conditions applicable to the furnishing of competing local exchange Services offered by Company to Customers in the State of Idaho, subject to availability.
- B.** Company has been granted Commission authority to provide Local Exchange Service in the areas served by Qwest Corporation, as set forth in [Section 5](#) of Qwest Corporation's Exchange and Network Services Catalog, which Company adopts as its own, and interexchange service Statewide.

This Tariff does not cover any information service or other unregulated service offered by Company.
- D.** Company may not be deemed to have waived or impaired any right, power, requirement or option reserved by this Tariff (including, but not limited to, the right to demand exact compliance with every term and condition herein), by virtue of any custom or practice of Company at variance with the terms hereof, or any failure, refusal or neglect of Company to exercise any right under this Tariff or to insist upon exact compliance with its terms, or any waiver, forbearance, delay, failure or omission by Company to exercise any right, power or option hereunder.
- E.** The rates, rules, terms and conditions contained herein are subject to change pursuant to the rules and regulations of the Commission.
- F.** This Tariff is governed and interpreted according to the Laws of Idaho.
- G.** The included Tariff language does not constitute a determination by the Commission that a limitation of liability imposed by the Company should be upheld in a court of law. Acceptance for filing by the Commission recognizes that it is a court's responsibility to adjudicate negligence and consequential damage claims. It is also the court's responsibility to determine the validity of the exculpatory clause.

(T)(M)*
- C. Call Forwarding Busy/Don't Answer/Variable: Call forwarding is the ability to forward an incoming call to a pre-selected station if the called station is unable to receive the call. "Call forwarding busy" will forward the call if the called station is in use; "call forwarding don't answer" will forward the call after a predetermined number of rings; "call forwarding variable" will forward the call regardless of the status of the called station.
- D. Call Trace: Permits the tracing of the last call received and holds the results for later use by an authorized law enforcement agency. Results of call trace will be provided only to appropriate law enforcement personnel, and not to the customer.
- E. Call Waiting: Call Waiting is the ability of the called station to generate a tone when the called station is in use to alert the user that another call is waiting to connect with the called station. (T)(M)
(T)(M)^
- F. Call Waiting ID: Call waiting ID is the ability to identify the party calling when on another call.

3.3.1. Custom Calling Feature Descriptions, Continued

- I. Continuous Redial: Allows a customer to dial a code that will cause the feature to automatically redial the last number the customer dialed. This service is available on a usage or subscription basis. (M)[^]
(N)
- J. Last Call Return: The customer does not have to know the number of the calling party. If the calling party's number is blocked by the calling party, the service will not return the call. (N)
(T)
- K. Non-Listed Service: Allows a customer to refuse Directory Listing Service. (T)
(D)
(M)[^]
- L. No Solicitation: Allows a customer to deter sales and telemarketing calls received by the customer. This is accomplished via a recorded message which informs the caller that the customer does not accept telephone solicitation, and ask solicitors to hang up and to place the called part on the solicitors "do-no-call" list. No Solicitation automatically screens calls between the hours of 8:00 A.M. until 9:00 P.M. daily. A caller may press one, or stay on the line to complete the call connection. (M)
(T)
- M. Remote Call Forward: This feature allows a user at a "remote" location to activate/deactivate the call forwarding feature. The user gains remote access to the call forwarding feature from a touch tone phone at a remote location. The RACF feature uses an announcement system to provide interactive voice message prompting, which allows customer to verify the forwarded-to directory number. Changes are accomplished by remotely calling an access number, entering the appropriate line and PIN information when prompted, and making the desired changes. (T)
(T)
- N. Selective Call Forwarding: Allows a customer to use Call Forwarding for selected numbers.
- O. Speed Calling: Speed Calling permits placing calls to 8 to 30 telephone numbers dialing an abbreviated code. (M)[#]

5.1. IDAHO TELECOMMUNICATIONS SERVICE ASSISTANCE PROGRAM

The Idaho Telecommunications Service Assistance Program (ITSAP) consists of two programs, Lifeline and Linkup, that were developed to provide discounted rates for telephone service to low income customers, thus promoting universal service. The programs are jointly sponsored (federal and state) telephone assistance programs designed to maximize federal contributions to Idaho's low-income customers.

The programs provide reductions in monthly rates for single line telephone service and/or reductions in one-time costs for installation of telephone service for qualifying customers. The program is administered by the Department of Health and Welfare in accordance with *Idaho Code, § 56-901*.
