2.4 Use of Service (continued)

- 2.4.3 Service furnished by the Company will not be used for any unlawful or fraudulent purposes including but not limited to use of electronic devices, invalid numbers, and false credit devices to avoid payment for Service contained in this Price List either in whole or in part. Service furnished by the Company may not be used to make calls which might reasonably be expected to frighten, abuse, torment, or harass another. 2.4 Use of Service (continued)

2.4.4 (continued)

- (B) One Joint User or Authorized User must be designated as the Customer. The designated Customer does not necessarily have to have communications requirements of its own. Service Orders which involve the start, rearrangement or discontinuance of joint use or authorized use of Service will be accepted by the Company only from that Customer and will be subject to all requirements of this Price List.
- (C) All charges for the Service will be computed as if the Service were to be billed to one Customer. The Joint User or Authorized User which has been designated as the Customer will be billed for all components of the Service and will be responsible for all payments to the Company. If designated Customer fails to pay the Company, each Joint User or Authorized User will be liable to the Company for all charges incurred as a result of its use of the Company's Service. - (D) Joint use is a Service/billing allocation arrangement and not a resale arrangement. Neither the Customer nor any Joint User nor any third party engaged by either of them in connection with a joint use agreement or arrangement may mark up Service or otherwise profit from the joint use agreement or arrangement.

SECTION 2 - RULES AND REGULATIONS

2.7 Obtaining Services

2.7.1 General

To obtain Service, the Company requires the Customer to provide the Company with whatever authorization the Company deems appropriate. For example, the Company may require the Customer to execute a letter of agency, service agreement, RespOrg agreement, contract, etc. depending on the Service(s) selected by the Customer. Service may be initiated based on written or oral agreement between the Company and the Customer. The Company reserves the right to require an Applicant to sign an application for the Service desired, on a form provided by the Company, as a condition for establishing Service. Applications for Service will be accepted by the Company provided that the Service is available, and the Company has no reason to believe the Customer will not comply with the provisions of this Price List. The Company will also accept an oral application from a Customer for additions to or changes in existing Service. Upon the Company's acceptance of this authorization, all applicable provisions in the Company's Price List, as amended from time-to-time, become the agreement for Service between the Company and the Customer. The Company reserves the right, at any time, to require any Customer to present proof of identification to the Company as the Company may then deem acceptable. SECTION 2 - RULES AND REGULATIONS

2.12 Mileage Measurements

2.12.1 The mileage between rate centers is calculated based on V and H coordinates as obtained by reference to AT&T Tariff FCC No. 10. Calculation between Serving Wire Centers is based on V and H coordinates as obtained by reference to NECA FCC Tariff No. 4. The mileage for a call between Access Lines associated with stations that use the same rate center is one mile. If Feature Group B is used, the distance will be measured from the rate center of the tandem location or network site to which the Feature Group B line is connected. If Feature Group D access is used, the distance will be measured from the rate center of the calling number.

2.12.2 Airline mileage between service locations is calculated as follows:

FORMULA:

The square root of: $\frac{(V_1-V_2)^2 + (H_1-H_2)^2}{10}$

Where V_1 and H_1 are the V and H coordinates of point 1 and V_2 and H_2 are the coordinates of point 2.

Mileage is rounded up to an integer value to determine the airline mileage.

SECTION 2 - RULES AND REGULATIONS

2.13 Timing of Calls

2.13.1 Unless otherwise indicated in this Tariff, on Station-to-Station calls and on Direct-Dialed calls chargeable time begins when the called station answers and the connection is established between the calling station and the called station, miscellaneous common carrier, mobile radio system, or PBX system. Answer detection is determined based on standard industry answer detection methods, including hardware and software answer detection. However, when Services are directly connected to a Customer-provided communications systems at the Customer's or End User's premises, chargeable time begins when a call terminates in, or passes through, the first Customer equipment on that Customer-provided communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of interface with the Company's Service so that chargeable time may begin.

(D)
|
(D)

2.13.2 Unless otherwise indicated in this Tariff, chargeable time ends when the calling station hangs up thereby releasing the network connection. If the called station hangs up but the calling station does not, chargeable time ends when the network connection is released either by the automatic timing equipment in the telecommunications network or by the operator.

(T)

2.14 Rate Periods

Different rates may be applicable to a call at different times of the day and on certain days of the week, as specified in the appropriate rate schedule for that call. All times shown are local time at the calling station in the case of an outbound call and at the called station in case of an inbound toll free call.

SECTION 2 - RULES AND REGULATIONS

2.15 Determining Rate In Effect

For outbound Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the calling station determines the rate in effect. For AT&T Long Distance Toll FreeSM Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the called station determines the rate in effect. If a unit of time is split between two (2) or more rate periods, each rate period applies to the portion of the call that occurred during that rate period rounded to the nearest billing increment. If a call is completed by an operator, the time at the beginning of each initial or additional rate period determines the applicable rate period. When a message spans more than one rate period, total charges for each rate period are calculated and the results for each rate period are totaled to obtain the total message charge.

T
T

2.16 Application of Charges

2.16.1 Rounding

Each usage sensitive Switched Service has its own specific initial period and additional period (collectively referred to as billing increments) as specified in Section 3 of this Price List. For all Services, fractions of a billing increment are rounded up to the next higher increment for billing purposes. The usage charges for each completed call during a billing month will be computed. If the charge for the call includes a fraction of a cent of \$.005 or more, the fraction of such charge is rounded up to the next higher whole cent. Otherwise, the charge is rounded down to the next lower whole cent. Rounding for charges for Service(s) is on a call-by-call basis.

2.16.2 BTN Account Changes

(A) Discounts

A change in Service or enrollment in a promotional offering that impacts the Customer's usage discount is effective on the first day of the next billing cycle after the change order is processed.

SECTION 2 - RULES AND REGULATIONS

2.16 Application of Charges (continued)

2.16.3 Monthly Recurring, Optional Feature or One-Time Charge

- (A) If Service is provided for less than a billing cycle, all associated intrastate monthly recurring charges will be prorated for the time Service was provided to the Customer.
