Idaho Public Utilities Commission
P.O. Box 83720
Boise, ID 83720-0074

RE: CASE NO. AWW-W-13-01 FIRST PRODUCTION REQUEST

Dear Mr. Price:

In response to your FIRST PRODUCTION REQUEST for additional information on Acme Water Works, Inc. request for a Certificate of Public Convenience and Necessity, we are unable to meet the submittal requirement date of **WEDNESDAY, SEPTEMBER 25, 2013**. Although we have been diligently working on obtaining the requested information, previous commitments for this time period have precluded us from being able to respond within the brief two working weeks allotted.

Some required information, produced by the responsible engineering firm, is not available to Acme Water Works due to not payment. No funding is available, at this time, to bring the engineering firm up-to-date. All real estate within the development has been repossessed and the only available funding is revenue generated by delivery of water to the existing customers.

Requested information that is available, is being accumulated and should be forwarded to the Commission by: **OCTOBER 31, 2013**.

If you require additional information please contact Mr. Bob Hansen at: Water Systems Management, Inc., 67 Wild Horse Trail, Sandpoint, ID 83864 – (208) 265-4270, phone or wsmibob@aol.com, e-mail.

Sincerely,

A handwritten signature in blue ink that reads "Bob Hansen". The signature is cursive and fluid.

Bob Hansen
Acme RCO
