Comment: "I am objecting to the recent request to increase water rates to benefit Capital Water Corp. The proposed increase equates to a 37% increase which i find to be unreasonable. They cited "administrative costs" as justification for the increase, however when i go on location to pay my bill it is the same two or three people working there every time. I doubt that they are looking to expand their locations and hire more staff. I am sincerely asking you to review this increase to the fullest extent to justify such a large increase in rates overnight. "
