Name of Utility Company: Diamond Bar Water

Comment: I listened to the testimony at the public hearing and it is obvious the failure of so many pumps in such a short period of time was due to the company cutting corners, incompetency and equipment not up to code or modern standards.

Currently water volume/pressure during the day is extremely low. There are 11 more homes to be built in Boekel Estates, all of which will have to be on Diamond Bar Water. I wonder if the current system will be able to handle the increase.

I urge the commission to require Turnipseed to update and or bring the system and equipment up to current standards and codes at his expense before any rate increase is granted.
