Comment: "Why the hell is it being proposed that my small apartments water bill go up 40% while big properties using 5x as much water goes down 20%. If I had more money to spare, don't you think I wouldn't be living in an apartment?! Do NOT raise the lower income class's water bill!!! "

Comment: "A 47% increase is way out of line! This should not be allowed to happen. Falls water need to reevaluate its current corporate structure and ways they conduct business more efficiently before passing their lack of management skills to the customers. In no way should the customers pay for Falls Water inability to manage budgets and find more efficient ways to operate. Please make Falls water show us they are being responsible with the funds that they receive. Let's see the BOOKS! Thank You"
