Comment: "This comment is in reference to the price increase request that was filed by Falls Water. I feel that not only is the proposed price increase outrageously high, it's not at all needed. Idaho Falls utilities charges \$28 for water, and they service triple the amount of homes. If a price increase is needed why does it need to be so much? 47%+ is going to cause undue hardship on homeowners. It may not seem like a lot to a company who is seeking to gain a million extra dollars per year, but to the average homeowner in todays economic climate every dollar counts. Please do not allow this price increase! "
