Comment: "It is ridiculous to increase water pricing. We live in an apartment as a family of four and still only use on average 3000-4000 gallons of our allotted 11,000 gallons. We already pay the same price of \$31.68 per month as someone that uses 3 times what we use. (Tier 1, 1" Residential) There is no need to increase water pricing again on top of recent price increases. We are already forced to pay much more than we should. Especially with the recent water issues of low pressure."
