Subject: Suez Investment Plan: Fee Increase Thursday, October 1, 2020
Date: 3:08:12 PM

Hello Jan,

I received an email from Suez regarding their Investment Plan that will increase consumer water bills 22.3%. I am asking the Commission to consider that a 22.3% hike is too aggressive all at one time for consumers.

State incomes have not increased proportionally with other utility, food, housing, costs, and this water bill increase will be a large burden on many Idahoans also struggling, especially in 2020-21 due to the business closures and economic crisis related to COVID 19.

Perhaps Suez could profit less on the deal and the rate increase to cover costs of the infrastructure spread out over a few years.

Thank you for your consideration,
Heidi N Hartnett

Comment: "I feel that a 22.3% increase is too high of a rate increase especially during this very tough economic down turn caused by Covid-19. I realized that updates to the water system are needed and will be helpful, but this is a high rate increase. If this is in part caused by the fast growth of our community then developers of new subdivisions should be paying more of a development fee to fund the water system growth."
