

## AVISTA REBATE PROGRAMS

### Program Eligibility and Guidelines

Rebates are available for residential energy efficiency measures completed after June 30, 2002. Offers apply to residential homeowners. The home does not need to be owner-occupied to qualify; however, renters do not qualify to receive rebates.

### Natural Gas Furnace/Boiler Rebates

\$200 rebate to homeowners who install a high-efficiency gas furnace of 90% AFUE or greater, or a high-efficient Natural Gas Boiler of 85% AFUE.

Applicable to existing single- and multi-family residences (up to a fourplex), including manufactured, modular and new-construction homes. (Primary residences only, excluding vacation homes.)

### Heat Pump Rebates

\$300 rebate to homeowners whose primary heat source is electric heat and who install an Air-Source Heat Pump of 8.0 HSPF (heating efficiency) with 13.0 SEER (cooling efficiency) or greater. Replacement of an existing heat pump qualifies for a \$50 rebate.

Applicable to existing single and multi-family residences (up to a fourplex), including manufactured, modular and new-construction homes.

### Thermostat Rebates

Up to \$40.00 rebate to homeowners with manual thermostats who install a Programmable Thermostat, with a minimum of four separate/discrete time programs per day capability. Either 7-day or 5/2-day programming is allowed. (Rebate cannot exceed 50% of the actual cost).

Applicable to existing single- and multi-family residences (up to a fourplex), including manufactured, modular and new-construction homes.

### Weatherization Rebates

Attic, Floor, and Wall Insulation: A rebate of 12 cents per square foot for the addition of new insulation installed increasing the R-value by R-10 or greater. Rebates not available if existing insulation exceeds R-22 for attic, R-11 for walls and/or R-11 in floors.

Duct Insulation: A rebate of 75 cents per linear foot of R-11 insulation for customers installing insulation on heating ducts in unconditioned areas.

Blown Wall Insulation: A rebate of 12 cents per square foot for blown-in wall insulation applications. (Same R-values stated above.)

Applicable to existing single- and multi-family residences (up to a fourplex) includes manufactured and modular homes. Does not apply to new construction or non-living areas such as garages. (Please see the current Avista rebate program brochure for additional information).

### High Efficiency Water Heater Rebates

\$50.00 rebates to homeowners who install either high-efficiency electric or natural gas water heaters (storage tank type). Electric heaters must be 0.91 EF or greater, natural gas heaters must be 0.62 EF for 40-gallon and 0.60 for 50-gallon heaters.

Applicable to existing single- and multi-family residences (up to a fourplex), including manufactured, modular and new construction. Can be claimed in addition to the electric to natural gas water heater rebate.

### Electric to Natural Gas - Water Heater Rebates

A \$150.00 rebate to Avista electric customers who replace an electric water heater with a new Natural Gas Water Heater (storage tank type). Does not apply to new construction.

(Please see the current Avista rebate program brochure for additional information and conditions).
