Re: Case No. IPC-E-08-21
*IN THE MATTER OF IDAHO POWER COMPANY'S APPLICATION FOR
APPROVAL OF A SPECIAL CONTRACT TO SUPPLY POWER TO HOKU
MATERIALS, INC.*

Dear Ms. Jewell:

Enclosed please find for filing an original and seven (7) copies of Idaho Power's Application in the above matter.

In addition, enclosed are an original and eight (8) copies of the testimony of John R. Gale which is being submitted in support of Idaho Power's enclosed filing. One copy of Mr. Gale's testimony has been designated as the "Reporter's Copy." In addition, a disk containing a Word version of the above testimony has been provided for the Reporter and has been marked accordingly.

I would appreciate it if you would return a stamped copy of this letter for my file in the enclosed stamped, self-addressed envelope.

Very truly yours,

Barton L. Kline

IN THE MATTER OF IDAHO POWER)
COMPANY'S APPLICATION FOR) CASE NO. IPC-E-08-21
APPROVAL OF A SPECIAL CONTRACT)
TO SUPPLY POWER TO HOKU) APPLICATION
MATERIALS, INC.)
_____)

COMES NOW, Idaho Power Company ("Idaho Power" or "Company") and, in accordance with RP 052, hereby requests that the Idaho Public Utilities Commission ("Commission") issue its Order approving a special contract for electric service between Idaho Power and Hoku Materials, Inc. ("Hoku"). Idaho Power and Hoku are hereinafter referred to singly as "Party" and collectively as "Parties." This Application is based on the following:

1. Background.

Hoku is currently constructing a polysilicon production facility ("Hoku Facility") in Pocatello, Idaho. The electrical demand at the Hoku Facility will exceed 25,000 kW. Idaho Power's rate Schedule 19, Large Power Service, provides that customers whose electrical demand exceeds 25,000 kW must make special contract arrangements with the Company. Idaho Power and Hoku have negotiated an energy sales agreement which complies with the requirements of a special contract under Idaho Power's Commission approved Tariff No. 101. A copy of the Hoku energy sales agreement ("ESA") and Rate Schedule 32, which contains the proposed rates for Hoku's service under the ESA, are enclosed with this Application as Attachment No. 1.

2. In conjunction with the ESA, Idaho Power and Hoku have also entered into an agreement under which Hoku has agreed to fund and Idaho Power has agreed to construct the interconnection facilities necessary to provide service to the Hoku Facility ("Construction Agreement"). Because the Construction Agreement is not a special contract under Idaho Power's rate schedules, the Company is not seeking approval of the Construction Agreement. However, for the Commission's convenience in reviewing the ESA, a copy of the Construction Agreement is enclosed as Attachment No. 2.

3. In conjunction with this Application, Idaho Power has filed the direct testimony of John R. Gale. Mr. Gale's testimony provides additional detail regarding the rates and terms of the ESA and presents evidence to support the Company's position that Commission approval of the ESA would be in the public interest.

4. Contract Provisions.

For the most part, the ESA is similar to other special contracts Idaho Power has signed with large customers. The material provisions of the ESA which are unique to the ESA are summarized here and addressed in greater detail in Mr. Gale's testimony in support of the ESA.

(a) Term.

The term of the ESA commences on June 1, 2009, and concludes on May 31, 2013. After June 1, 2013, either Party can terminate the ESA on one-year's prior written notice. If the effective date of a termination occurs before a replacement special contract between the Parties can be negotiated and placed into effect, then Hoku's energy and demand rates will be the Schedule 19-T rates until a replacement contract is approved.

(b) Contract Demand.

To accommodate Hoku's schedule for gradually increasing its production at the Hoku Facility and to allow Idaho Power adequate time to secure new resources, the Parties have agreed that Hoku's scheduled demand will vary by season. Section 6.1.1 of the ESA sets out the scheduled contract demands during the summer and non-summer periods during the term of the ESA. The maximum demand during the four-year term of the ESA is 82 MW.

Section 6.1.1 also contains an acknowledgment by Hoku that Idaho Power is in the process of expanding its system capacity and the Company's obligation to serve Hoku's scheduled contract demand during the summer load period of 2012 is contingent on the timely completion of major transmission and generation projects.

(c) Rate Blocks.

Hoku's contract demand and energy is broken into two blocks for pricing purposes. The first block demand charge is priced to be reflective of system access costs – firm transmission and ancillary services. The first block of energy is priced at a level equivalent to Idaho Power's current Commission-approved avoided cost rates.

Charges for the second block (25 MW) are based on the Company's approved Schedule 19-T rate.

Under this two-block pricing arrangement, energy is sold to Hoku at a rate that contains both embedded and marginal cost components, thereby reducing upward rate pressure on existing customers due to the addition of the ESA. Mr. Gale's testimony, filed with this Application, further explains the rationale underlying the two-block rate structure.

Both the demand components and the first block of energy impose take-or-pay requirements on Hoku. However, Idaho Power has agreed that Hoku may request a release of all or part of its first block energy purchase commitment. If Hoku makes such a request, Idaho Power will make a commercially reasonable effort to absorb or resell the released energy and provide a credit to Hoku. The amount of the credit will depend on the period of time for which it has notice of Hoku's request and the Company's ability to manage any supply commitments to serve Hoku's load.

5. Procurement of Additional Power.

As previously noted, Idaho Power may not be able to provide all of the power Hoku would like to take during the summer period. If Hoku desires to take additional power during the summer, paragraph 5.6 of the ESA obligates Idaho Power to make

commercially reasonable efforts to obtain proposals to supply Hoku's additional energy request. If power is available, any additional purchases and delivery are subject to Idaho Power's ability to deliver the power to Hoku and Hoku's acceptance of the price and terms of the proposals. Hoku is responsible for the full cost of these purchases and any associated transmission and ancillary service expense to transport such purchase to the Hoku Facility. Hoku can expand its first block contract demand up 175,000 kW, but its ability to expand its first block contract demand is dependent on the availability of adequate capacity in Idaho Power's facilities to provide and deliver the additional power.

6. Rate Schedule 32.

Attached to the ESA is a proposed Schedule 32 which sets out the rates and charges under the ESA. These rates and charges are subject to the continuing jurisdiction of the Commission and can be revised by the Commission in an order, supported by substantial evidence, that such a rate change or revision is just, reasonable, sufficient, non-preferential, and non-discriminatory. The proposed effective date of Schedule 32 is June 1, 2009, to coincide with the commencement of the ESA.

7. PCA Treatment of ESA Expenses and Revenues.

For PCA purposes, Idaho Power proposes to treat first block revenues and expenses as if they were wholesale purchases and sales, thereby removing them from PCA treatment. Mr. Gale's testimony explains why this PCA treatment is reasonable and consistent with PCA principles previously approved by the Commission.

8. The ESA will only become effective upon the approval by the Commission of all terms and provisions without change or condition.

9. Communications regarding this Application should be sent to:

CASE NO. IPC-E-08-21

IDAHO POWER COMPANY

ATTACHMENT NO. 1

OCT 24 2008

ELECTRIC SERVICE AGREEMENT
BETWEEN
IDAHO POWER COMPANY
AND
HOKU MATERIALS, INC

Boise, Idaho

THIS AGREEMENT FOR ELECTRIC SERVICE is executed on 9/17/2008 by HOKU MATERIALS, INC, a Delaware Corporation ("Hoku") and IDAHO POWER COMPANY, an Idaho Corporation ("Idaho Power"). In consideration of the mutual covenants hereinafter set forth, the parties hereby agree as follows:

SECTION 1 - SPECIAL CONTRACT

1.1 This Agreement is a Special Contract as described in Idaho Power's Schedule 19.

SECTION 2 - DEFINITIONS

When used in this Agreement:

2.1. "Commission" shall mean the Idaho Public Utilities Commission or its successor agency.

2.2. "Construction Agreement" shall mean that certain Agreement for Construction of Hoku Electric Substation and Associated Facilities dated as of December 28, 2007, by and between Hoku and Idaho Power, as such may be amended from time to time.

2.3. "Contract Load Factor" shall mean 90 percent for purposes of establishing the energy blocks for monthly billing.

2.4. "Embedded Date" shall mean June 1, 2013.

2.5. "Embedded Rate" shall mean the demand and energy rates detailed in the Company's then-effective Schedule 19T.

2.6. "Excess Demand" shall mean the average kilowatts supplied during the coincident 15-consecutive-minute period of maximum use each day, adjusted for Power Factor, which exceeds the Total Contract Demand.

2.7. "Excess Energy" shall mean any kilowatt-hours of energy supplied to the Hoku Facility during the monthly billing period as measured by the metering equipment located at the Points of Delivery that exceeds the sum of the First Block Energy and the Second Block Energy.

2.8. "First Block Contract Demand" shall mean the monthly number of kilowatts Idaho Power has agreed to make available to the Hoku Facility in accordance with the Scheduled Contract Demand in Section 6.

2.9. "First Block Energy" shall mean the kilowatt-hours determined by multiplying the First Block Contract Demand by the number of hours in the billing period multiplied by the Contract Load Factor.

2.10. "Hoku Facility" shall mean the Hoku Polysilicon Production complex located on One Hoku Way, Pocatello, Idaho.

2.11. "Interconnection Facilities" shall mean all facilities which are reasonably required by Prudent Electrical Practices and the National Electric Safety Code to interconnect and deliver electrical power and energy to the Hoku Facility, including, but not limited to, transmission facilities, substation facilities and metering equipment.

2.12. "Minimum Billed Energy" shall mean the number of kilowatt-hours determined by multiplying 50% of the Total Contract Demand for the billing month by the number of hours in the billing month at the Contract Load Factor.

2.13. "Points of Delivery" shall mean the locations specified in paragraph 5.2 where the electrical facilities owned by Hoku are interconnected to the electrical facilities owned by Idaho Power and where power and energy are delivered by Idaho Power for the purpose of providing electrical service for the operations of the Hoku Facility.

2.14. "Power Factor" shall mean the percentage obtained by dividing the maximum demand recorded in kW by the corresponding kilovolt-ampere (kVa) demand established by Hoku.

2.15. "Prudent Electrical Practices" shall mean those practices, methods and equipment that are commonly and ordinarily used in electrical engineering and utility operation to operate electrical equipment and deliver electric power and energy with safety, dependability, efficiency and economy.

2.16. "Schedule 19" shall mean the Company's then effective Idaho Retail Tariff Schedule 19T.

2.17. "Schedule 32" shall mean the Hoku tariff schedule of rates and charges or its successor schedules.

2.18. "Scheduled Contract Demand" is defined in Section 6.1.1 below.

2.19. "Second Block Contract Demand" shall mean 25,000 kilowatts.

2.20. "Second Block Energy" shall mean the total kilowatt-hours supplied to the Hoku Facility during the monthly billing period as measured by the metering equipment located at the Points of Delivery less the First Block Energy, but no greater than 25,000 kilowatts multiplied by the number of hours in the billing period multiplied by the Contract Load Factor.

2.21. "Total Contract Demand" shall mean the sum of the First Block Contract Demand and the Second Block Contract Demand as specified in Section 6, and as such may be modified pursuant to Section 6.2 below.

2.22. "Transformer Losses" shall mean energy losses resulting when a transformer changes the voltage level of alternating current electricity. Transformer losses will be accounted for in the initial metering installation.

SECTION 3 - TERM OF AGREEMENT

3.1 This Agreement shall become effective as provided in paragraph 15.1 and remain in effect through the Embedded Date and will be automatically renewed

thereafter until either Hoku or Idaho Power terminates this Agreement as provided in paragraph 4.1.

3.2 It is the intention of the parties that following the Embedded Date, the parties shall enter into a new Special Contract whereby Hoku shall pay energy and demand rates that are equal to the lesser of the then-applicable Schedule 19 rate or the average of the contract rates in Idaho Power's then-effective other "Special Contracts". These Special Contract rates will remain in effect on an interim basis until the next final Commission order in a general rate case proceeding.

3.3 Service under this Agreement will commence June 1, 2009.

SECTION 4 - TERMINATION

4.1 Notice of Termination: After the Embedded Date, either party to this Agreement shall have the right to terminate this Agreement by delivering written notice of termination to the other party. The effective date of termination will be specified in the termination notice, but such effective date cannot be earlier than 12 months after the date of the delivery of the notice of termination. If both parties give notice of termination, the earliest effective date will prevail. If the effective date of a termination occurs before the new Special Contract is effective between the Parties as described in Section 3.1 above, then the applicable energy and demand rates shall be the Embedded Rate.

SECTION 5 - SERVICES TO BE PROVIDED

5.1 Supply Obligation: In accordance with Prudent Electrical Practices and the provisions of this Agreement, Idaho Power will furnish Hoku's total requirements for electric power and energy at the Hoku Facility. Hoku will not resell any portion of the power and energy furnished under this Agreement.

5.2 Points of Delivery: Electric power and energy shall be delivered by Idaho Power at each point generally described as the load side terminals of the substation transformer 13.8 kilovolt disconnect switches at the Hoku Facility.

5.3 Adjustment for Transformer Losses: Metering on the load side of the substation transformers will be adjusted for Transformer Losses.

5.4 Description of Electric Service: Idaho Power shall supply three-phase, 60 hz alternating current at nominal 13,800 volts, with a maximum steady state variation of plus or minus five percent (5%) under normal system conditions. Consistent with Prudent Electrical Practices, Idaho Power will operate within the capability of its existing system to minimize voltage level fluctuations, the normal frequency variation to be within plus or minus 0.05 hz on a 60 hz base.

5.5 Available Capacity: Idaho Power will make power available to Hoku in an amount equal to the kilowatts of Total Contract Demand shown in Section 6.1.1.

5.6 Request for Proposals: During the initial term of the agreement, at Hoku's request, Idaho Power will use commercially reasonable efforts to obtain proposals to supply power to meet Hoku's summer loads not served by Idaho Power. Idaho Power will customize such supply request to match Hoku's requirements. These additional purchases are subject to Idaho Power's ability to deliver the power to Hoku

and Hoku's acceptance of the price and terms of the proposals. Hoku is responsible for the full costs of these purchases and any associated transmission and ancillary service expense to transport such purchases to the Hoku Facility.

5.7 Release of First Block Energy: With adequate notice and the written consent of Idaho Power, Hoku may request a release of all or part of its First Block Energy purchase commitment in return for credit on its First Block Energy Charge. The value of the credit will be determined by mutual agreement and will take into consideration the timing of the notice and Idaho Power's ability to manage any supply commitments made on Hoku's behalf.

SECTION 6 - CONTRACT DEMAND

6.1 Contract Demand Provisions prior to the Embedded Date: The following provisions apply during the period of time from June 1, 2009 to the Embedded Date, while Hoku is changing its load at the Hoku Facility.

6.1.1 Scheduled Contract Demand: Hoku agrees to contract for, and Idaho Power agrees to provide power made available to the Hoku Facility in the following amounts expressed in kilowatts (the "Scheduled Contract Demand"):

Time Period	First Block Contract Demand	Second Block Contract Demand	Total Contract Demand
6/1/2009 – 9/15/2009	18,000	25,000	43,000
9/16/2009 – 12/31/2009	57,000	25,000	82,000
1/1/2010 – 6/15/2010	57,000	25,000	82,000
6/16/2010 – 8/15/2010	18,000	25,000	43,000
8/16/2010 – 9/15/2010	42,000	25,000	67,000
9/16/2010 – 12/31/2010	57,000	25,000	82,000
1/1/2011 – 6/15/2011	57,000	25,000	82,000
6/16/2011 – 8/15/2011	18,000	25,000	43,000
8/16/2011 – 9/15/2011	42,000	25,000	67,000
9/16/2011 – 12/31/2011	57,000	25,000	82,000
1/1/2012 – 6/15/2012	57,000	25,000	82,000
6/16/2012 – 8/15/2012	57,000	25,000	82,000
8/16/2012 – 9/15/2012	57,000	25,000	82,000
9/16/2012 – 12/31/2012	57,000	25,000	82,000
1/1/2013 – 5/31/2013	57,000	25,000	82,000

Hoku acknowledges that Idaho Power is in the process of expanding its system capacity and the Company's ability to provide the amount of power shown above for the summer load period from 6/16/2012 to 9/15/2012 is contingent on the timely completion of major

transmission and generation projects. Hoku agrees that if there are delays in the completions of these projects, the amount of power to be made available to Hoku from 6/16/2012 to 9/15/2012 may be reduced to match the summer load in the previous year.

6.2 Contract Demand Provisions after Initial Expansion: After the Embedded Date, Hoku has the option to increase or decrease its Total Contract Demand level as follows:

6.2.1 Increases to Total Contract Demand: Under the terms of this Agreement, Hoku may increase the Total Contract Demand above 82,000 kilowatts by increasing the First Block Contract Demand in increments of 1,000 to 10,000 kilowatts per year up to a Total Contract Demand of 175,000 kilowatts. Hoku will notify Idaho Power in writing of the additional capacity requirements at least one year in advance. The new Total Contract Demand will be in effect for a minimum of one year. Increases to Total Contract Demand are subject to the availability of adequate capacity in Idaho Power's facilities to provide the requested service.

6.2.2 Decreases to Total Contract Demand: After the Embedded Date, Hoku may decrease the Total Contract Demand by reducing the First Block Contract Demand in decrements of 1,000 kilowatts. Total Contract Demand may not be decreased below 25,000 kilowatts. Hoku will notify Idaho Power in writing of the decrease in capacity requirements at least one year in advance. The new Total Contract Demand will be in effect for a minimum of one year.

6.3 Excess Demand: Prior to the Embedded Date, and subject to Section 6.2.1 above, the availability of power in excess of the Total Contract Demand is not guaranteed, and if the average kilowatts supplied at the Hoku Facility during the 15-consecutive-minute period of maximum use each day, adjusted for power factor, exceeds the Total Contract Demand, Idaho Power may curtail service to the Hoku Facility. Idaho Power reserves the right to install, at any time, at Hoku's expense, any device necessary to protect Idaho Power's system from damage which may be caused by the taking of Excess Demand. Hoku will be responsible for any damages to Idaho Power's system or damages to third parties resulting from the taking of Excess Demand. Hoku agrees to use its best reasonable efforts to monitor its electric loads and to advise Idaho Power as soon as possible of the potential for Excess Demand at the Hoku Facility. Excess Demand will be subject to the Daily Excess Demand Charge and the Monthly Excess Demand Charge specified in Schedule 32.

6.4 Proration: Billings during months that contain a change in the Scheduled Contract Demand will be prorated.

SECTION 7 - FACILITIES FOR DELIVERY TO HOKU FACILITY

7.1 Additional Facilities: The parties acknowledge that they have separately entered into the Construction Agreement, pursuant to which Hoku is paying Idaho Power to construct the Interconnection Facilities necessary to provide the Total Contract Demand under this Agreement. Idaho Power represents and warrants to Hoku that none of the charges set forth in Schedule 32 include any cost reimbursement or adjustment that is already being paid by Hoku pursuant to the Construction Agreement, and that such Interconnection Facilities are sufficient to supply the Scheduled Contract Demand. To the extent that additional transmission and/or substation Interconnection Facilities are required to provide additional service pursuant to Section 6.2.1 above,

special arrangements will be made in a separate Agreement between Hoku and Idaho Power.

7.2 Operation and Maintenance: Idaho Power will operate and maintain Interconnection Facilities necessary to provide service to the Hoku Facility. Such Interconnection Facilities include Interconnection Facilities paid for by Hoku, including those paid for by Hoku pursuant to the Construction Agreement. Idaho Power shall operate and maintain such Interconnection Facilities in accordance with Prudent Electrical Practices.

SECTION 8 - CHARGES TO BE PAID BY HOKU TO IDAHO POWER

8.1 Rates and Charges: The rates and charges for electrical power, energy and other services provided by Idaho Power to the Hoku Facility are identified by component in Schedule 32. The total amount to be paid by Hoku for electric service to the Hoku Facility will be the sum of the components identified on Schedule 32.

8.2 Power Factor: When the Hoku Facility's Power Factor is less than 95 percent during the 15-consecutive-minute period of maximum use for the monthly billing period, Idaho Power will determine the Total Billing Demand by multiplying the metered demand in kilowatts by 0.95 and dividing that product by the Power Factor.

8.3 Billing and Metering Provisions: Idaho Power will install and maintain suitable metering equipment for each Point of Delivery so that coincident demand and energy consumption can be determined for the billing period.

8.4 First Block Contract Demand Charge: The First Block Contract Demand Charge is fixed and is not subject to change through the Embedded Date. After the Embedded Date, the Contract Demand Charge is subject to change and revision by order of the Commission. After the Embedded Date, Idaho Power will advocate for Commission acceptance of the ratemaking treatment for the Special Contract described in Section 3.2 above.

8.5 First Block Energy Charge: The First Block Energy Charge and Excess Energy Charge are fixed and are not subject to change through the Embedded Date. After the Embedded Date, the Energy Charge and Excess Energy Charge are subject to change and revision by order of the Commission. After the Embedded Date, Idaho Power will advocate for Commission acceptance of the ratemaking treatment for the Special Contract described in Section 3.2 above.

8.6 Second Block Charges: The Second Block Contract Demand Charge and the Second Block Energy Charge will increase or decrease uniformly with any base rate change authorized by the Commission that is applicable to Idaho Power's Tariff Schedule 19T through the Embedded Date. After the Embedded Date, the Second Block Contract Demand Charge and the Second Block Energy Charge are subject to change and revision by order of the Commission.

8.7 Power Cost Adjustment: The Power Cost Adjustment (PCA) rate as defined under Idaho Power's Tariff Schedule 55 will be applied to the Second Block Energy only. The PCA rate will not apply to the First Block Energy or to Excess Energy.

8.8 Conservation Program Funding Charge: The Conservation Program Funding Charge as specified in Idaho Power's Tariff Schedule 91 for Schedule 19 will be applied to the sum of the Second Block Charges, Excess Demand Charges, and Excess Energy Charges.

8.9 Minimum Energy Charges: Each month Hoku will be billed for the actual metered kilowatt-hours of energy, but no less than the Minimum Billed Energy amount defined in Section 2.12.

SECTION 9 - PAYMENT OF BILLS/SETTLEMENTS

9.1 Billing Data: Hoku shall pay Idaho Power for all services provided under this Agreement. Invoices for payment for electric services shall be prepared and submitted to Hoku monthly. All invoices or bills shall contain such data as may be reasonably required to substantiate the billing.

9.2 Payment Procedure: All bills or accounts for electric service owed by Hoku to Idaho Power hereunder shall be due and payable within fifteen (15) days following Hoku's receipt of a bill. Payment will be made by electronic transfer of funds. Idaho Power will provide Hoku with current ABA routing numbers and other necessary instructions to facilitate the electronic transfer of funds.

SECTION 10 - ACCESS TO PREMISES

10.1 During the term of this Agreement, and for a reasonable period following termination, Idaho Power shall have access to the Hoku Facility premises at all times for the purposes of reading meters, making installations, repairing and removing Interconnection Facilities and Idaho Power equipment and for other proper purposes hereunder.

SECTION 11 - ASSIGNMENT

11.1 This Agreement shall be binding upon the heirs, legal and personal representatives, successors and assigns of the parties hereto.

SECTION 12 - LIABILITY

12.1 Each party agrees to protect, defend, indemnify and hold harmless the other party, its officers, directors, and employees against and from any and all liability, suits, loss, damage, claims, actions, costs, and expenses of any nature, including court costs and attorney's fees, even if such suits or claims are completely groundless, as a result of injury to or death of any person or destruction, loss or damage to property arising in any way in connection with, or related to, this Agreement, but only to the extent such injury to or death of any person or destruction, loss or damage to property is not due to the negligence or other breach of legal duty of such other party; provided; however, that each party shall be solely responsible for claims of and payment to its employees for injuries occurring in connection with their employment or arising out of any workman's compensation law.

12.2 Limitation of Liability: Neither party shall, in any event, be liable to the other for any special, incidental, exemplary, punitive or consequential damages such as, but not limited to, lost profits, revenue or good will, or interest, whether such loss is based on contract, warranty, negligence, strict liability or otherwise.

SECTION 13 - MODIFICATIONS OF CONTRACT

13.1 This Agreement may not be modified except by writing, duly signed by both parties hereto.

SECTION 14 - COMMISSION JURISDICTION

14.1 This Agreement and the respective rights and obligations of the parties hereunder, shall be subject to (1) Idaho Power's General Rules and Regulations as now or hereafter in effect and on file with the Commission and (2) to the jurisdiction and regulatory authority of the Commission and the laws of the State of Idaho.

14.2 The terms, conditions, and rates set forth in this Agreement and Schedule 32 are subject to the continuing jurisdiction of the Commission. The rates under this Agreement are subject to change and revision by order of the Commission upon a finding, supported by substantial competent evidence, that such rate change or revision is just, fair, reasonable, sufficient, nonpreferential, and nondiscriminatory. It is the parties' intention by such provision that the rate making standards to be used in making any revisions or changes in rates, and the judicial review of any revisions or changes in rates, will be the same standards that are applicable to Idaho intrastate tariff rates.

SECTION 15 - COMMISSION APPROVAL

15.1 This Agreement shall become effective upon the approval by the Commission of all terms and provisions hereof without change or condition.

SCHEDULE 32

IDAHO POWER COMPANY
ELECTRIC SERVICE RATE
FOR HOKU MATERIALS, INC.
POCATELLO, IDAHO

ELECTRIC SERVICE AGREEMENT DATED SEPTEMBER 17, 2008

APPLICABILITY

This schedule is applicable to service to Hoku Materials, Inc. (Hoku) served by Idaho Power Company under the terms of an Electric Service Agreement (ESA) dated September 17, 2008.

MONTHLY CHARGE

The Monthly Charge is the sum of the following charges and may also include applicable charges for Schedule 55 (Power Cost Adjustment), Schedule 91 (Energy Efficiency Rider), and Schedule 95 (Adjustment for Municipal Franchise Fees).

FIRST BLOCK MONTHLY CHARGES

First Block Contract Demand Charge

\$2.35 per kW times the First Block Contract Demand

First Block Energy Charge

6.166 cents per kWh times the First Block Energy (subject to the Minimum Billed Energy amount specified in the ESA)

SECOND BLOCK MONTHLY CHARGES

Second Block Contract Demand Charge

\$3.77 per kW times the Second Block Contract Demand

Second Block Energy Charge

2.3769 cents per kWh times the Second Block Energy (subject to Minimum Billed Energy amount specified in the ESA)

EXCESS DEMAND CHARGES

Daily Excess Demand Charge

\$0.50 per each kW of Excess Demand per day

Monthly Excess Demand Charge

\$5.00 per kW for the highest Excess Demand recorded during the billing period

EXCESS ENERGY CHARGE

7.708 cents per kWh of Excess Energy

**AMENDED & RESTATED AGREEMENT
FOR CONSTRUCTION OF HOKU ELECTRIC SUBSTATION
AND ASSOCIATED FACILITIES**

Boise, Idaho

THIS AMENDED & RESTATED AGREEMENT for the construction of Hoku electric substation and associated facilities (the "Agreement") is entered into as of the 17th day of September, 2008 by and between HOKU MATERIALS, INC., One Hoku Way, Pocatello, Idaho 83204 ("Hoku") and IDAHO POWER COMPANY, P.O. Box 70, Boise, Idaho 83707 ("Idaho Power" or "IPCO"). Hoku and IPCO may also be referred to hereinafter individually as "Party" or collectively as the "Parties".

RECITALS

A. Hoku is developing a manufacturing plant to produce polysilicon, a key material used in the production of solar cells and integrated circuits. The construction of an electric substation and associated transmission facilities is required to allow IPCO to supply electric capacity and energy to Hoku's manufacturing complex located at One Hoku Way in Pocatello, Idaho ("Hoku Facility"). Hoku has requested that the substation and associated facilities be sized to allow IPCO to provide electric service to the Hoku Facility in an amount up to 82 Megawatts ("MW") of demand.

B. Hoku and IPCO are parties to that certain Agreement for Construction of Hoku Electric Substation and Associated Facilities dated December 28, 2007 (the "Prior Agreement"). This Agreement shall amend and restate in its entirety, the Prior Agreement.

C. Because the Hoku Facility will be located in an area where Idaho Power does not have existing facilities of adequate capacity, delivery of power to the Hoku

Facility site will require the construction of (1) approximately six (6) miles of 138,000 volt overhead transmission line to interconnect with Idaho Power's existing transmission system, (2) a new 138,000-13,800 volt electric substation at the Hoku Facility to supply up to 82 MWs with two 67 MVA transformers, and (3) additional equipment and facilities at IPCO's existing substations. These facilities are sometimes hereinafter collectively referred to as the "Requested Facilities" and are described in greater detail in Exhibit 1 to this Agreement. This Agreement is not subject to or governed by Rule H, Idaho Power's tariff governing line installations, including any revisions to that rule, or any successor rules or schedules.

D. Idaho Power will construct the Requested Facilities in accordance with the terms and provisions of this Agreement.

E. Pursuant to the Prior Agreement, HOKU has paid Idaho Power the sum of \$7,402,000, the receipt of which is hereby acknowledged by Idaho Power. An outstanding balance of \$3,701,000 is presently owed under the prior Agreement and is hereby acknowledged by Hoku. This outstanding amount is included in the payments listed in Section 2.1 below.

NOW, THEREFORE, in consideration of the mutual obligations and undertakings set forth herein, and other good and valuable consideration, the sufficiency of which is hereby acknowledged, Hoku and Idaho Power agree as follows:

AGREEMENTS

1. Construction of Requested Facilities Without duplicating any of the work performed pursuant to the Prior Agreement, and in furtherance thereof:

1.1 Idaho Power will construct the Requested Facilities to provide for the delivery of power (capacity) at a point generally described as the load side terminals
