IPC-E-11-14

To Whom it may Concern:

IDAHO PUBLIC UTILITIES COMMISSION

Concerning Western Desert Energy I and
Seablowed Energy II - PLEASE, PUC

Commissioners, assert your jurisdiction over them and do not allow them to succeed with this sales agreement to provide energy to the Utilities Oregon Customers. My neighbors, friends and myself, have been treated fairly concerning rates, and prompt responses to outages and other power emergencies.

I am not familiar with the Elmore County project - but I am familiar with the Owyhee County project. As written at this time, it looks like nothing but a glorified land grab attempt, plus an attempt to override Oregon PUC.

I think wind power is a good concept - but not at the expense of loss of property, privacy and the right to protect one's land.

Thank you,

Nellie J. Holey
