State: Idaho
Zip: 83619
Daytime Telephone:
Contact E-Mail: bef1951@fmtc.com
Name of Utility Company: Idaho Power Company
Acknowledge: acknowledge

Please describe your comment briefly:

Every year Idaho Power Co wants a rate increase for one reason or another. Every year I try to conserve more and more power and my bill keeps going up. Isnt it time for IPUC to say no to these rate increases and make them run the buisness on revenues they have.

They keep preaching conservation but the more you conserve the higher the rate they want. Oregon PUC doesnt go along with all the increases. The bills for Oregon also do not have the same charges that are on Idaho customers bill.

They used to be a good company until greed took them over. Please do not approve anymore rate increases. We are already paying to high a rate for no farther than we have to get our power.

I urge the public utility commission to do their due diligence and investigate the recent filing for a rate increase, and other recent actions by idaho power. I strongly believe that a rate increase should NOT be approved. Idaho power has stated that it wants to do what is best for its customer but I believe this is false. With the recent suspension of the cool credit program and now a rate increase power bills are going to get pretty high. The only reduction in monthly electric bills for most homeowners now is the chance of a reduction in the energy efficiency fee that all of us have to pay because of the termination of the demand response programs. I don't think customers should be penalized for poor financial management from the power company.
