Company: PacificCorp
mailing_list_yes_no: yes
Comment_description: Commissioners,

I would like to make a few points on the way this proposed irrigation load control program is being made.

1:As an irrigator I need to be informed of the details in order to make a decision on whether to participate or not.

2:Without some idea of what my savings will be, How can I decide if it will help my operation? Will there be yeild reductions if I go on the progam? I cann't make this determanation with out some info.

3:If March 14 is the deadline for sign up, when and how is Pacificcorp going to inform the irrigator? Will we have time to make a decision?

4:How will this progam affect the rate I'm on now?

5:Is the company going to determine the rate after the use or before? The farmers cost is determined when he signs up. We need to know the savings up front.

6:The hours off and the time we will be shut off has a big impact on whether we can sign up. This year with the water shortage canals will be on tight controls.

There are a lot more Questions that need anwsers and this is just what I've thought of. Other farmers will have other questions as it affects their operation and as they are provided with info about the program. WE NEED THE INFORMATION IN THE FARMERS HANDS !!!!

I tried to down load the info but all I get is blank pages from your web site. Would you please send me what you have.
