Please describe your comment briefly:

Rocky Mtn. Power has had numerous increases for their power already, they should have known the condition of the company when they purchased it. We purchased our home a little over 7 years ago our bill averaged about \$110. to \$115. per month since then they have changed the rating on our home well 3 to 4 times and now our bills are averaging \$170. to \$180 per month even tho we purchased wind power per month. I'm sorry why do you keep allowing increases when the economy is so bad they purchased this company knowing it's condition when i've called before even to your office it's, to bad so sad, the electric company said the last change on my well was because i put the meter away from my house , they put the meter in not me only their employee can put it in and hook it up , i'm sorry there request for an increase should be denied, they purchased the company knowing the condition of the equipment why do we have to keep paying for their purchase of the company with numerous increases in a short time instead of gradual increases with the economy.
