Ms. Diane Hanian, Commission Secretary
Idaho Public Utilities Commission
472 W. Washington Street
Boise, ID 83720-5983

**RE: Potlatch Idaho PUC ID No. 2 Switched Access Tariff Compliance for
FCC 11-161, § 51.(g) Step 6 (Released Nov 18, 2011)**

Dear Ms. Jewell:

Please find enclosed tariff pages for the Potlatch PUC ID No. 2

**Access Service First Revised Sheet 26
Second Revised Sheets 208 through 211**

The purpose of this filing is to modify the Company's intrastate applicable switched access rates to follow Interstate Switched rates changes per 51.909 (a) (5) (i) rules and to continue to be in parity with the Company's interstate rates per FCC Rule 51.909 (g) Step 6 phase down rule. The Company is exiting the NECA Traffic Sensitive Pool, and will provide interstate access services out of the JSI FCC Tariff No. 1. The Company views these tariff changes as administrative because they are consistent with the FCC's rules.

The TRP Exhibit is also enclosed in a separate envelope marked CONFIDENTIAL. The TRP has been filed on a confidential basis due to competitively sensitive data listed on the spreadsheet. Rate element demand can be used by competitors.

The proposed effective date for this tariff filing is **July 1, 2017**.

If you have any questions or concerns regarding this filing, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read 'Kris A. Groth', is written over the word 'Sincerely,'.

ACCESS SERVICES

2. **GENERAL REGULATIONS** (Continued)

2.3 Obligations of the Customer (Continued)

2.3.10 Identification and Rating of VoIP-PSTN Traffic (Continued)

(B) Rating of Toll VoIP-PSTN Traffic

In the absence of an interconnection agreement between the Telephone Company and the customer specifying the treatment of VoIP-PSTN Traffic, VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Telephone Company's applicable tariffed interstate switched access rates as set forth in the John Staurulakis, Inc. (JSI) Tariff FCC No. 1.¹ If the FCC Order is stayed or overturned, VoIP-PSTN Traffic will be billed under this tariff at the rates applicable to non-VoIP-PSTN interexchange traffic.

(C)

(C) Calculation and Application of Percent-VoIP-Usage Factor

- (1) The Telephone Company will determine the number of terminating intrastate Toll VoIP-PSTN Traffic minutes of use (MOU) to which interstate rates will be applied under (A), preceding, by applying a terminating PVU factor to the total intrastate access MOU terminated by a Customer to the Telephone Company's end user.
- (2) The Telephone Company will determine the portion of dedicated facilities to which interstate rates will be applied under (A), preceding, by applying a PVU factor for dedicated switched access facilities to the dedicated facilities between the Telephone Company and the Customer.
- (3) The Telephone Company will determine the number of originating intrastate Toll VoIP-PSTN Traffic minutes of use (MOU) to which interstate rates will be applied under (2), preceding, by applying an originating Percent VoIP Usage (PVU) factor to the total intrastate access MOU originated by a Telephone Company end user and delivered to the customer.
- (4) The Customer will calculate and furnish to the Telephone Company a terminating PVUC factor (along with the supporting documentation as specified in (C)(10) below) representing the whole number percentage of the Customer's total terminating intrastate access MOU that the Customer sent to Telephone Company and which originated in IP format and that would be billed by the Telephone Company as intrastate terminating access MOU.
