E. Residence Product Save Program (Cont'd) 3.

Rates and Charges

a. Customers may be offered one of the following on selected products as determined by the Company:

- (1) A waiver of an amount up to 100% of the current residence nonrecurring charge(s), or
- (2) A waiver of up to one month of the recurring rates, or
- (3) A waiver of an amount up to 100% of the current residence nonrecurring charge(s) and up to one month of the recurring rates, or
- (4) A benefit or consideration offered or provided that is not associated with a service or product offered by the Company such as CPE, merchandise, or discounts on merchandise offered by others, gift certificates, gift cards, or otherwise and with a retail value not to exceed the sum of 3.a.(3), above.

b. The waiver(s) will appear in the form of a credit(s) on the customer's bill.

c. The total waived amount will not exceed the total nonrecurring charges(s) plus one month's service of the monthly rate(s).

F. Business Product Save Program 1.

Description

The Business Product Save Program is an offering to current My Choice Communications MCCI business customers who request to have one or more products disconnected and who decide to retain the product(s) after having been informed of the product(s) benefits and this program.

F. Business Product Save Program (Cont'd)

2. Terms and Conditions

- a. The Business Product Save Program may be offered only to current My Choice Communications MCCI business customers who request to have one or more products disconnected.
- b. Business customers will receive the waiver(s) only one time per product from My Choice Communications MCCI
- c. The Company shall use reasonable business efforts so that similarly situated customers are offered similar incentive waivers in similar circumstances.
- d. The Company reserves the right to discontinue this offer, without further proceedings or approvals, upon 30 days notice to the Idaho Public Utilities Commission.

3. Rates and Charges

- a. Customers may be offered one of the following on selected products as determined by the Company:
 - (1) A waiver of an amount up to 100% of the current residence nonrecurring charge(s), or
 - (2) A waiver of up to one month of the recurring rates, or
 - (3) A waiver of an amount up to 100% of the current residence nonrecurring charge(s) and up to one month of the recurring rates, or

5. EXCHANGE SERVICES

5.3 PRIVATE BRANCH EXCHANGE (PBX) TRUNKS

1. The following services are offered as regulated services to business customers who subscribe to 5 or fewer lines pursuant to Title 61, Idaho Code.
2. PBX Service is not provided on a one-way basis. Therefore, in-only, out-only, or two-way trunks must be used in combinations which provide for two-way service for the PBX system.
3. See 5.4.11 in the Exchange and Network Services Catalog for terms, conditions, rates and charges applicable to Hunting Service.
4. Nonrecurring Change Charge

The following nonrecurring change charge applies to each trunk when changing the types of trunks within the categories of in-only, out-only or both-way at the customer's request.

	NONRECURRING CHARGE
• PBX trunks, each	\$41.00

Effective: 03/01/2006

5. EXCHANGE SERVICES

5.3 PRIVATE BRANCH EXCHANGE (PBX) TRUNKS

5.3.2 MESSAGE TRUNKS (Cont'd)

5. Semipublic Message Trunk Service is available to hotels, motels, and clubs to meet the telephone service requirements of their transient guests. Where warranted, in the opinion of the Company, this service arrangement may also be provided for hospitals, apartment houses, condominium complexes, courts and trailer parks where a considerable portion of the rooms or other units are regularly occupied by guests, patients or tenants for relatively short periods of time so that it is impracticable to provide regular exchange-type telephone service.
6. Any class, grade or type of business service regularly offered may be furnished to such locations in addition to the Semipublic Service, provided the use of the business service is confined to the management of the particular business establishment. Regular residence service may also be furnished in the quarters of guests, tenants, and/or patients in addition to Semipublic Service.
7. Under special circumstances, where in the opinion of the Company, it is practical to provide the necessary facilities, the tenants in separate motels, hotels, apartment houses, etc., may be served by one System. Under this arrangement all of the establishments must be under one ownership and operated as a single property. In such cases, the regular mileage charge treatment is applicable. Should one or more of the establishments cease to be under the same ownership, this service arrangement will be discontinued and separate service provided, as required for the establishments no longer under the same ownership.
8. Where regular flat rate or Centrex Service is provided to hospitals, regular residence service may also be furnished in the quarters of guests and tenants.

5.3.2 MESSAGE TRUNKS (Cont'd)

9. Residence additional listings may be furnished to permanent guests, tenants, etc., at regular additional listing rates.
10. The customer receiving Semipublic Service is responsible to the Company for all charges at the regularly quoted rates for telephone messages, telegrams, cablegrams, and radiograms sent-paid from or received-collect at telephones of the system, whether sent or received by the customer for his own account or by or for others.
11. A single Semipublic PBX System may be arranged to provide flat or message trunk service to the administrative portion of the service and either flat or message trunk service to the guest portion of the Service; providing, where both flat and message trunk services are used, one trunk service will not supplement the other. A special charge may be made to the customer to cover the cost of modifying the service, if required, to provide such service. The Company will furnish message indications from the serving CO on message trunk service where facilities permit.

5. EXCHANGE SERVICES

5.3 PRIVATE BRANCH EXCHANGE (PBX) TRUNKS (Cont'd)

5.3.4 DIRECT-INWARD-DIALING (DID) SERVICE

A. Description

1. The following service is offered to all business customers who subscribe to 5 or fewer lines pursuant to Title 61, Idaho Code.
2. Direct-Inward-Dialing (*DID*) Service is a special trunking arrangement which permits incoming calls from the exchange network to reach a specific PBX (Private Branch Exchange) station directly without an attendant's assistance.

B. Regulations

1. This feature may be provided, in addition to regular, FCO or FX rates and charges, where CO facilities are available and the PBX system or customer provided switching equipment capabilities permit.
2. One primary directory listing in the main directory of the serving CO is provided for each PBX system. An additional listing of each *DID* number may be provided subject to the regulations, rates, and charges as specified in 5.7.1.
3. The provision of this feature requires that the customer subscribe to a sufficient number of trunk facilities to adequately handle the volume of incoming calls.
4. *DID* service is available to new customers from non-ESS offices if the office is equipped for *DID* service and has sufficient *DID* capacity available.
5. Sequential numbers may be assigned if blocks of numbers are available and at the discretion of the Company. Rates and charges associated with sequential numbers are specified in C. Rates And Charges following.

A *DID* sequential number block is a group of twenty (20) telephone numbers in numeric order. The last digit of the first number within the block is a zero (0), and the last number within the number block must include an odd number in the sixth digit and a nine (9) in the last digit.

6. *DID* Service is offered with switching vehicles served by trunk service. Answer Supervision is required from the customer's switching vehicle.

5.4.2 CUSTOM CALLING SERVICES

A. Description

Custom Calling Services include one or more of the following features:

Abbreviated Access

Allows a customer to place a call to a predetermined telephone number by dialing an abbreviated code. Two arrangements are available, namely, Abbreviated Access, one-digit or Abbreviated Access, two-digit.

The customer shares a speed call list with their Abbreviated Access provider and the provider controls the speed call list and informs clients of the digit(s) to dial to reach the predetermined telephone number.

Call Curfew

Allows the customer the ability to block incoming and outgoing calls. The feature can be turned on and off manually or automatically by pre-set schedules which have been defined by the customer.

When the feature is activated, incoming calls will be blocked and the calling party will hear an announcement that the customer is unavailable. For outgoing calls, the customer will hear a fast busy and the call will not be completed. When the feature is not activated, normal call processing will occur.

Call Forwarding - Busy Line

• Expanded Forwarding

Allows a customer to have incoming calls forwarded to another predetermined number in a different central office switch if the called number is busy.

• External Forwarding

Allows a customer to have incoming calls forwarded to another predetermined number outside the customer's system but within the same central office switch if the called number is busy. The customer's system is service for which the customer is billed at that location.

• Overflow Forwarding

Allows a customer to have incoming calls forwarded to another predetermined number within the same central office switch if the called number is busy.

• Programmable Forwarding

Allows a customer to have incoming calls forwarded to another number when the called number is busy. The customer can activate and deactivate the forwarding feature by dialing a code as well as establish or change the number to which calls will be forwarded.

A. Description (Cont'd)

Call Forwarding - Busy Line/Don't Answer

• Expanded Forwarding

Allows a customer to have incoming calls forwarded to another predetermined number in a different central office switch if the called number is busy or if the customer does not answer after a preset number of ringing cycles.

• External Forwarding

Allows a customer to have incoming calls forwarded to another predetermined number outside the customer's system but within the same central office switch if the called number is busy or to any number within the same central office switch if the called number does not answer (where available).

• Overflow Forwarding

Allows a customer to have incoming calls forwarded to another predetermined number within the same central office switch if the called number is busy or does not answer.

Call Forwarding - Don't Answer

Allows a customer to have incoming calls forwarded to another number within the same central office switch if the customer does not answer after a preset number of ringing cycles.

• Expanded Forwarding

Allows a customer to have incoming calls forwarded to another predetermined number in a different central office switch if the customer does not answer after a preset number of ringing cycles.

• Programmable Forwarding

5.4 PREMIUM EXCHANGE SERVICES (Cont'd)

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

Call Forwarding - Variable

Enables the customer to forward incoming calls to another number by dialing a code, plus the number to receive the call. Call Forwarding-Variable, for PBX customers, will only work on one trunk at a time. The feature will also remove that trunk from rotary hunting service during its use.

Call Rejection

Enables a customer to reject call attempts from up to 15 numbers of calling parties by dialing a code and the telephone numbers of calls to be rejected. Any call attempts to the customer from these numbers will be prevented from terminating to the customer and will instead be connected to an announcement informing the caller that the call is not presently being accepted by the called party. A customer may also reject future calls from the most recent call received by dialing a code after completing the call.

Call Trace

Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only. After receiving the call which is to be traced, the customer dials a code and the traced telephone number is automatically sent to the Company for further action. The customer originating the trace will not receive the traced telephone number. The results of a trace will be furnished only to legally constituted law enforcement agencies or authorities upon proper request by them. Manual Trap and Trace is available where facilities permit.

Call Transfer

Enables a customer to transfer an incoming call to a third party or add a third party to an existing call, forming a three party connection, and then to leave the connection without disconnecting the call.

5. EXCHANGE SERVICES

5.4 PREMIUM EXCHANGE SERVICES (Cont'd)

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

Call Waiting

When a customer is talking on the telephone, a short spurt of tone signals him that a call is waiting. The tone is heard only by the Call Waiting customer, while the incoming caller hears a regular ringing signal. Flashing the switchhook holds the first call while the second is answered. The customer can alternate between calls by flashing the switchhook.

Call Waiting, can be temporarily cancelled by the customer prior to or during any call by dialing a specific code. Incoming calls will receive a busy signal. Upon disconnecting from the call in progress, normal call waiting is automatically restored.

Where facilities and equipment permit, customers who have a line equipped with Call Waiting and Call Forwarding Don't Answer and/or Call Forwarding Busy Line, will be provided a feature so that Call Forwarding Don't Answer and/or Call Forwarding Busy Line forwards an incoming call to the number designated by the customer when the incoming call is not answered in response to the Call Waiting tone.

A customer with Caller Identification may also receive name and/or number information on a call that is waiting (USOC: N2W). (The customer must have the appropriate CPE.)

A customer who subscribes to Call Waiting may enhance their service to separately identify local and long distance calls. Different tones will distinguish the two types of calls, whether at the initial ring cycle or in the call waiting mode. There is no additional charge for this Long Distance Alert feature enhancement, nor will the Company charge to add this feature.

A customer who subscribes to Call Waiting may also enhance their service by adding Talking Call Waiting to their line. Talking Call Waiting is an enhancement that provides an audible announcement of the incoming caller's name. The audible announcement consists of the regular Call Waiting tone followed immediately by the calling party's name.

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

CALLER ID WITH PRIVACY +

Includes the Caller Identification - Name and Number functionality and, in addition, provides the customer with the ability to screen private and unidentified calls that are placed to their number.

Callers placing a call from a private or blocked telephone number to a *CALLER ID WITH PRIVACY +* customer will hear a series of prompts asking them to unblock their line or record their name for delivery to the called party. Callers placing a call from an unidentified number will be asked to record their name for identification purposes and to hold the line.

When the calling party records their name, the service will call the *CALLER ID WITH PRIVACY +* customer and the Caller ID unit will display "*PRIVACY +*" which identifies that the call is from the *CALLER ID WITH PRIVACY +* service. The customer will also hear a distinctive ring unless they subscribe to Custom Ringing. If the customer answers the call from the *CALLER ID WITH PRIVACY +* service, they will hear the recorded name and may then choose between three options for handling the incoming call. They may accept the original call, they may choose not to accept the original call, or, if they subscribe to Voice Messaging, they can direct the original call to their mailbox.

Continuous Redial

Allows a customer to dial a code that will cause the feature to automatically redial the last number the customer dialed. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called number becomes available. This service is available on a usage or subscription basis.

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

Caller Identification - Name and Number

Allows for the automatic delivery of a calling party's name and telephone number (including non-published and non-listed telephone numbers) to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The name and number are displayed on customer provided equipment.

The name displayed shall be the name associated with the calling telephone number as shown on the Company's records. The Company, in its discretion, may abbreviate or limit that name for display purposes. The Company does not assure name accuracy, and it shall not be liable to any party for errors, omissions or mistakes. The Company's sole and only obligation shall be to reasonably correct errors in names when notified in writing of such errors.

Caller Identification Customers who do not wish to receive blocked calls can activate Anonymous Call Rejection (USOC: AYK) by pressing *77 (1177 on rotary phones). The code to deactivate is *87 (1187 on rotary phones). While the feature is activated, incoming blocked calls are routed to an announcement in the central office. Anonymous Call Rejection is automatically available to residence subscribers of Caller Identification and to business subscribers where technically feasible.

Caller Identification - Number

Allows for the automatic delivery of a calling party's telephone number (including nonpublished and nonlisted telephone numbers) to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The number is displayed on customer provided equipment.

Caller Identification Customers who do not wish to receive blocked calls can activate Anonymous Call Rejection (USOC: AYK) by pressing *77 (1177 on rotary phones). The code to deactivate is *87 (1187 on rotary phones). While the feature is activated, incoming blocked calls are routed to an announcement in the central office. 5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

Dial Lock

Allows a customer the ability to manage their outbound calls (local, local long distance, and toll) by selectively blocking different types of calls placed from their line. This service will allow blocking to: all non-emergency local calls; long distance calls; international calls; operator assisted; toll free; information services; and directory assistance calls. The customer will select the types of calls they wish to have blocked. Customers may override the blocking at anytime through a personalized assigned PIN code.

Dial Call Waiting

Allows a customer with a line equipped with the feature to direct a Call Waiting tone or a Distinctive Alert signal to a line equipped with Distinctive Alert. The feature is activated by dialing a preset access code and the telephone number of the line to which the signal is directed.

Directed Call Pick Up

Allows a customer to answer a call, during the ringing cycle, that is directed to another line by dialing a preset access code and the telephone number of the line to be answered. Both the originating line and the line to be answered must be equipped with the feature.

Directed Call Pick Up With Barge-In

Allows a customer to answer a call directed to another line which has been answered or is ringing by dialing a preset access code and the telephone number of the line to be answered. Both the originating line and the line to be answered must be equipped with the feature.

Distinctive Alert

Allows a customer to receive an audible Call Waiting tone or Distinctive Ringing signal from a line equipped with Dial Call Waiting. If the called line is idle, a Distinctive Ringing signal will be heard. If the called line is busy, the called line receives a Call Waiting tone.

5.4 PREMIUM EXCHANGE SERVICES (Cont'd)

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

Do Not Disturb

Allows a customer to prevent the ringing of their telephone. When the feature is activated, callers hear a customer selected greeting indicating that the customer is not available. If the customer has messaging service the caller may stay on the line and leave a message.

Easy Access

Allows a customer to place a call to a predetermined telephone number by dialing an abbreviated two-digit code. The dialing code is *98.

Hot Line

Hot Line service allows a customer to establish a switched connection to a predetermined number when the customer's telephone goes off-hook. No dialing is required and the call is processed automatically to the predetermined telephone number.

I-CALLED

I-CALLED allows for callers who encounter a "ring no answer" condition to record their name and telephone number for future delivery to the called party. The service provides a voice prompt for the caller to enter a touch-tone command. Once callers record their name and number, *I-CALLED* will attempt to deliver the information to the called party by calling the called party periodically for a predetermined number of days, or until the called party answers, whichever comes first. When the called party answers the *I-CALLED* call, the recorded information will be played through twice to ensure the called party hears the information. The called party will also have the opportunity to replay the message if needed. This service is billed to the calling party on a per use basis.

5.4 PREMIUM EXCHANGE SERVICES (Cont'd)

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

Last Call Return

Allows a customer to dial a code that will cause the feature to automatically redial the number of the last incoming call to that line, whether the call was answered or not. The customer does not have to know the number of the calling party. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called line is available. This service is available on a usage or subscription basis.

Last Call Return customers who do not wish to receive blocked calls can activate Anonymous Call Rejection (USOC: AYK) by pressing *77 (1177 on rotary phones). The code to deactivate is *87 (1187 on rotary phones). While the feature is activated, incoming blocked calls are routed to an announcement in the central office. Anonymous Call Rejection is automatically available to residence customers of Last Call Return and to business customers where technically feasible; and to monthly (subscription) customers only.

Priority Call

Allows a customer to assign a maximum of 15 callers' telephone numbers to a special list. The customer will hear a distinctive ring at his/her location, when calls are received from callers' telephone numbers on that list.

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

Remote Access Forwarding (Call Following)

A function which allows all incoming calls to be forwarded to another telephone number. It allows the customer to remotely change the termination of their incoming calls. From any tone signaling telephone, the customer can activate, deactivate, or change the destination number. This service is marketed to residential customers under the name of Call Following.

Scheduled Forwarding

A function which allows all incoming calls to be forwarded to another telephone number. It allows a customer to remotely change the termination of their incoming calls and base the termination upon a time schedule. From any tone signaling telephone, the customer can activate, deactivate, or change the times, days and destination numbers.

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

SECURITY SCREEN

Provides the customer with the ability to screen private and unidentified calls that are placed to their number. A customer who subscribes to *SECURITY SCREEN* must also subscribe to Caller Identification – Name and Number.

Callers placing a call from a private or blocked telephone number to a *SECURITY SCREEN* customer will hear a series of prompts asking them to unblock their line or enter a telephone number for delivery to the called party. Callers placing a call from an unidentified number will be asked to enter a telephone number for identification purposes. The *SECURITY SCREEN* customer will hear a distinctive ring if the calling party input the data passed unless they subscribe to Custom Ringing Service.

Unidentified callers will hear a message indicating that the person they are calling does not accept unidentified calls. The calling party will be told to hang up if they are a solicitor. All other callers will be asked to input the telephone number they are calling from. Once the calling party unblocks their line or enters a telephone number, they will be connected directly to the *SECURITY SCREEN* customer. The Caller ID unit will display one of the following:

- If the call is private or unavailable and the caller enters a ten-digit number from within Qwest's territory that is the same as the calling number, the display will carry the telephone number and the caller's name with an (*).

- If the call is private or unavailable and the caller enters a private ten-digit number that is different from the calling number, the display will show *SECURITY SCREEN* and the number the caller input.

- If the call is private or unavailable and the caller enters a ten-digit number outside of Qwest's territory, the display will read *SECURITY SCREEN* and the number the caller input.

- If the call is private or unavailable and the caller inputs one to nine digits (e.g. 2345), the display will read *SECURITY SCREEN* and the number the caller input backfilled with zeros (000-000-2345).

A caller who chooses not to unblock their line or enter a number will be advised that their call could not be completed and the call will be terminated.

5. EXCHANGE SERVICES

5.4 PREMIUM EXCHANGE SERVICES (Cont'd)

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

Selective Call Forwarding

Allows a customer to specify a special list of a maximum of 15 telephone numbers. Incoming calls placed to the customer from telephone numbers on that list will automatically be forwarded to a predefined telephone number. All other calls will be handled normally.

Selective Call Waiting

Includes the Call Waiting or Call Waiting Identification functionality and, in addition, allows the customer to establish and modify a list of telephone numbers that trigger the Call Waiting tone when the customer's line is in use. Calls from telephone numbers not on the list, or calls from unidentified callers will either hear busy tone when the customer's line is busy or if the customer subscribes to Voice Mail service, the call will be routed to the customer's mailbox.

Speed Calling

Enables the customer to call a preselected group of telephone numbers by dialing 1 or 2 digits rather than the actual number. Speed Calling is available with an 8 or 30 telephone number capacity. It will be provided to PBX customers only on the basis that all trunks will be equipped with Speed Calling and have a common numbering plan.

NO SOLICITATION

Allows a customer to deter sales and telemarketing calls received by the customer. This is accomplished via a recorded message which informs the caller that the customer does not accept telephone solicitations, and asks solicitors to hang up and to place the called party on the solicitors "do-not-call" list. No Solicitation automatically screens calls between the hours of 8:00 A.M. until 9:00 P.M. daily (may be disabled by the customer at any time if desired). A caller may press one, or stay on the line to complete the call connection.

5.4 PREMIUM EXCHANGE SERVICES (Cont'd)

5.4.2 CUSTOM CALLING SERVICES

A. Description (Cont'd)

Three-Way Calling

Enables a customer to add a third customer on an established local or long distance connection without operator assistance. The third customer may be called by the customer initiating the Three-Way Calling on either a local or long-distance basis. This service is available on a usage or subscription basis.

Warm Line

Warm Line service allows a customer to establish a switched connection to a predetermined number if the customer does not dial a number within a specified length of time after going off-hook. When the customer's telephone goes offhook and dialing begins within a specified time delay period, the call will proceed normally as dialed. If dialing has not started before the end of the predefined time delay period, a predetermined stored number is automatically dialed by the central office switching equipment.
