January 20, 2010

Ms. Jean Jewell
Commission Secretary
P.O. Box 83720
Boise, Idaho 83720-0074

VZN-T-10-01

RE: Broadband Tax Credit for 2008 Investment

Dear Ms Jewell:

Enclosed for filing with the Commission is the application of Verizon Northwest Inc. for a broadband tax credit for 2008. Verizon requests that the Commission find the Company eligible to receive an Idaho tax credit and that the broadband equipment installed in 2007 meets the definition of qualified broadband equipment as set out in Idaho Code 63-30291(3)(b).

- 1. Name and address of the applicant including a contact person in the event that there are questions regarding the application and its content.**

Kim Douglass, 600 Hidden Ridge, Irving, TX 75038, MC: HQE02F60

- 2. Indicate whether the applicant is a telecommunications carrier, a commercial mobile service carrier, a cable or video provider, a satellite carrier or other type of wireless carrier.**

Verizon Northwest Inc. is a telecommunications carrier.

- 3. Identify the area or location where the equipment is installed in Idaho.**

The equipment is installed in: Athol, Bayview, Bonners Ferry, Bovil, Coeur d'Alene Deary, Genesee, Hayden Lake, Hope, Kellogg, Moscow, Mullan, Orofino, Pinehurst, Post Falls, Priest Lake, Priest River, Rathdrum, Sandpoint, Spirit Lake, St. Maries, and Weippe.

4. Describe the type of broadband services offered to the public in Idaho.

The equipment installed in Idaho in 2008 is used to provide customers with DSL and high speed data (e.g. T-1) services.

5. State the network transmission rate in bits per second at which subscribers to the relevant broadband services can send and receive.

OCx – Optical Carrier specification used in ATM/SONET the ‘x’ represents a multiple of 51.84 Mbps transmission (OC3= 3 x 51.84 Mbps, OC24=24 X 51.84Mbps). Mbps = 1,000,000 bits/sec.

ISDN-PRI - Integrated Services Digital Network – Primary Rate Interface. The data rate is 1.544 Mbps and provides 23 B-channels to carry voice/data traffic and one (1) D-channel for signaling.

DSL – Digital Subscriber Line – is a communication technology that uses existing twisted-pair telephone lines to transport high-bandwidth data, such as Internet, multimedia, and video. SDSL and ADSL are the two varieties of DSL services. ADSL is drawing significant attention from service providers because it promises to deliver high-bandwidth data rates to dispersed locations with relatively small changes to the existing telephone company infrastructure at a reasonable cost. Download speeds can range from 138 Kbps to 6Mbps from the service providers.

6. Provide the specific list of the equipment types that the application is requesting that the Commission determine is qualified broadband equipment” as defined in Idaho Code 63-30291(3)(b). List the brand, manufacturer, model numbers, and or other distinguishing features of the installed equipment.

Please see the attached work order description.

7. **Quantify the percentage and number of potential Idaho customers that could be served with the broadband equipment and the percentage and number of non-Idaho subscribers that will be/could be served by the broadband network.**

<u>Exchange</u>	<u>Access Lines</u>	<u>% Qualifying</u>
Bayview	1,989	100
Bonnars Ferry	4,735	100
Bovill	280	100
Clark Fork	797	100
Coeur d'Alene	16,584	100
Deary	562	100
Genesse	516	100
Harrison	926	100
Hayden Lake	8,916	100
Hope	685	100
Kellogg	1,841	100
Moscow	11,149	100
Orofino	3,470	100
Peck	264	100
Pinehurst	2,123	100
Plummer-Worley	1,077	100
Post Falls	9,188	100
Potlatch	1,171	100
Priest River	1,887	100
Priest Lake	1,480	100
Rathdrum	3,456	100
Sandpoint	13,422	100
Spirit Lake	1,184	100
St. Maries	3,486	100
Wallace	1,783	100
Weippe	617	100

There are no Non-Idaho customers that could be served with the broadband equipment that was placed.

8. **Provide the dates and time periods that the broadband equipment was installed in Idaho.**

Please see the attached work order description

9. **Provide a written description (including the basic schematics or general drawings) of the relevant broadband network including a description of how the installed equipment is an "integral part" of the broadband network.**

Please see the attached work order description and network diagrams.

10. **Enclose a statement certifying that the applicant has read the applicable statutes for broadband investment income tax credit and the applicant believes that the subject broadband equipment qualifies for the tax credit under Idaho Code 63-30291.**

Please see the attached statement of certification.

If you have any questions concerning this filing, please contact me at 503-645-7909.

Sincerely,

Renee Willer
Regulatory Manager

IDAHO BROADBAND CERTIFICATION

I hereby certify that representatives of Verizon Northwest Inc. (the applicant have read the applicable statutes for the broadband investment tax credit and the applicant believes that the subject broadband equipment qualifies for the tax credit under Idaho Code 63-3029I.

Dated January 20, 2010

A handwritten signature in black ink, appearing to read "Rense Willer", written over a horizontal line.

State of Idaho Broadband Investment

The following list of Verizon work orders which in general provided Digital Switch Port equipment and/or plant investment and its associated installation labor. This equipment has the capability to allow the transmitting of signals rates of at least two hundred thousand (200,000) bits per second. The digital switch ports provide customers either ISDN PRI or Clear Channel (B8ZS) T-1s type of service. It is an integral part of a network that permits broadband signaling to occur. The equipment placed on the listed work orders was all placed into service within the physical borders of the State of Idaho. The location is further defined on the list by the tariff named exchange of the LEC.

State of Idaho Broadband Investment

The following list of Verizon work orders which in general provided Fiber Optic Terminal equipment and/or plant investment and its associated installation labor. This equipment has the capability to allow the transmitting of signals rates of at least two hundred thousand (200,000) bits per second. The fiber optic terminal equipment and associated muxes provide customers from OC48 down to T-1s type of service. It is an integral part of a network that permits broadband signaling to occur. The equipment placed on the listed work orders was all placed into service within the physical borders of the State of Idaho. The location is further defined on the list by the tariff named exchange of the LEC.
