Please describe your question or comment briefly:

We received the statement from Idaho Springs regarding their application. In the statement it indicates that the company is requesting the ability to charge a \$2500 first time connection fee. When I purchased the lot in August 2007, the purchase agreement we signed indicates that sewer and water hookup fees were included in the lot purchase price and would not be an additional assesment from the water company in the case of water access. I was also told at that time the all applications had been filed for, which was not the case. The intents of this request should call into question the legal implications the application will create. Are there options we as customers/future customers of this water company have to dispute the components of the application as it stands?

Gentlemen;

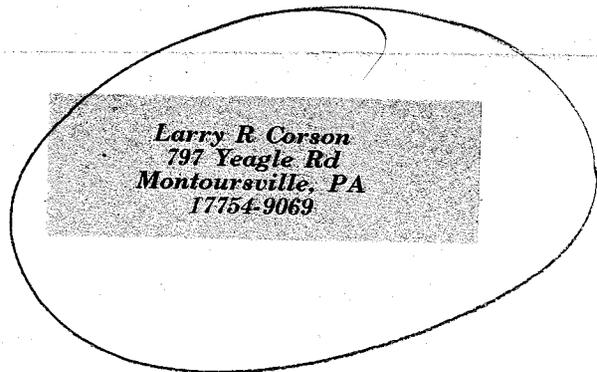

Regarding Case No. ISW-W-08-01 [Idaho Springs Water Company], Idaho Springs Water Company is merely a new name for the same bunch of criminals who have been operating as Arbor Ridge Water Company. Even the address is the same!

These criminals, through the owner of Arrowrock Ranch Subdivision, Greg Johnson, lied to all of us in that the \$1200/ year homeowners association dues included sewer and water charges. To our despair, they soon began charging us an additional \$200/month for sewer and water. These charges are exorbitant and the highest in all of Ada County. In addition, there have been continuous water quality problems with the service they provide.

Therefore; I protest their exorbitant proposed rates and charges for water service. You will note my Pennsylvania telephone number. The illegal charges these criminals levied on us have driven me away from Idaho and made it impossible to sell my home.

Sincerely,

  
Larry R. Corson
