INSTRUCTIONS FOR FILING FERC FORMS 1, 1-F and 3-Q

GENERAL INFORMATION

Purpose

Form 1 is an annual regulatory support requirement under 18 CFR 141.1 for Major public utilities, licensees and others. Form 1-F is an annual regulatory support requirement under 18 CFR 141.2 for Nonmajor public utilities, licensees and others. Form 3-Q is a quarterly regulatory support requirement which supplements Forms 1 and 1-F under 18 CFR 141.400. The reports are designed to collect financial and operational information from major and nonmajor electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be a non-confidential public use forms.

II. Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject To the Provisions of The Federal Power Act (18 CFR 101), must submit Form 1 as prescribed in 18 CFR Part 141.1. Each Nonmajor electric utility, licensee or other must submit Form 1-F as prescribed in 18 CFR Part 141.2. Each Major and Nonmajor electric utility licensee or other, must submit Form 3-Q as prescribed in 18 CFR Part 141,400.

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

- (1) one million megawatt hours of total annual sales,
- (2) 100 megawatt hours of annual sales for resale.
- (3) 500 megawatt hours of annual power exchanges delivered, or
- (4) 500 megawatt hours of annual wheeling for others (deliveries plus Losses).

Nonmajor means having in each of the three 'previous calendar years, total annual sales of 10,000 megawatt hours or more

- III. What and Where to Submit
- (a) Submit Forms 1, 1-F and 3-Q electronically through the Form 1/3-Q Submission Software. Retain one copy of each report for your files.
- (b) Respondents may submit the Corporate Officer Certification electronically, or file/mail an original signed Corporate Officer Certification to:

Chief Accountant Federal Energy Regulatory Commission 888 First Street, NE Washington, DC 20426

- (c) Submit, immediately upon publication, four (4) copies of the latest annual report to stockholders and any annual financial or statistical report regularly prepared and distributed to bondholders, security analysts, or industry associations. (Do not include monthly and quarterly reports. Indicate by checking the appropriate box on Form 1, Page 4, List of Schedules, if the reports to stockholders will be submitted or if no annual report to stockholders is prepared.) Mail these reports to the address in III(c) above.
- (d) For the Annual CPA certification, submit with the original submission, or within 30 days after the filing date for Form 1, a letter or report (not applicable to respondents classified as Class C or Class D prior to January 1, 1984):
- (i) Attesting to the conformity, in all material aspects, of the below listed (schedules and) pages with the Commission's applicable Uniform Systems of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and
- (ii) be signed by independent certified public accountants or an Independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 CFR 158.10-158.12 for specific qualifications.)

Insert the letter or report immediately following the cover sheet. When submitting after the filling date for this form, send the letter or report to the address indicated at III (b). Use the following form for the letter or report unless unusual circumstances or conditions, explained in the Letter or report, demand that it be varied, insert parenthetical phrases only when exceptions are reported.

GENERAL INFORMATION (continued)

In connection with our regular examination of the financial statements of for the year ended on which we have reported separately under date of We have also reviewed schedules of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

State in the letter or report, which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist

(d) Federal, State and Local Governments and other authorized users may obtain additional blank copies to meet their requirements free of charge from: Public Reference and Files Maintenance Branch Federal Energy Regulatory Commission 888 First Street, NE. Room 2A ED-12.2 Washington, DC 20426 (202).502-8371

IV. When to Submit:

Submit Form 1 according to the filing dates contained in section 18 CFR 141.1 of the Commission's regulations. Submit Form 1-F according to the filing dates contained in section 18 CFR 141.2 of the Commission's regulations. Submit Form 3-Q according to the filing dates contained in section 18 CFR 141.400 of the Commission's regulations.

V. Where to Send Comments on Public Reporting Burden.

The public reporting burden for the Form 1 collection of information is estimated to average 1,144 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information.public reporting burden for the Form 1-F collection of information is estimated to average 112 hours per response. The public reporting burden for the Form 3-Q collection of information is estimated to average 150 hours per response. Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Mr. Michael Miller, ED-30); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. 3512 (a)).

GENERAL INSTRUCTIONS

- I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR 101) (U.S. of A.). Interpret all accounting words and phrases in accordance with the U.S. of A.
- II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.
- III Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.
- IV. For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.
- V. Enter the month, day, and year for all dates. Use customary abbreviations. The "Date of Report" included in the header of each page is to be completed only for resubmissions (see VII. below).
- VI. Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.
- VII For any resubmissions, submit the electronic filing using the Form 1/3-Q software and send a letter identifying which pages in the form have been revised. Send the letter to the Office of the Secretary.
- VIII. Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.
- IX. Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

- FNS Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.
- FNO Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.
- LFP for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.
- OLF Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.
- SFP Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.
- NF Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.
- OS Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service form. Describe the type of service in a footnote for each entry.
- AD Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

DEFINITIONS

- I. Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization
- II. Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

EXCERPTS FROM THE LAW

Federal Power Act. 16 U.S.C. 791a-825r

- Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to wit: ... (3) . corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shalt not include 'municipalities, as hereinafter defined;
 - (4) 'Person' means an individual or a corporation;
- (5) 'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof:
- (7) 'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry an the business of developing, transmitting, unitizing, or distributing power;
- (11) "project' means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or forebay reservoirs directly connected therewith, the primary line or Lines transmitting power therefrom to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;
- "Sec. 4. The Commission is hereby authorized and empowered
- (a) To make investigations and to collect and record data concerning; he utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development -costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."
- "Sec. 304. (a) Every Licensee and every public utility shall file with the Commission such annual and other periodic or special* reports as the Commission may be rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the -proper administration of this Act. The Commission my prescribe the manner and form in which such reports shalt be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies*.10
- "Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the *form or forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be field..."

GENERAL PENALTIES

"Sec. 315. (a) Any licensee or public utility which willfully fails, within the time prescribed by the Commission, to comply with any order of the Commission, to file any report required under this Act or any rule or regulation of the Commission thereunder, to submit any information of document required by the Commission in the course of an investigation conducted under this Act shall forfeit to the United States an amount not exceeding \$1,000 to be fixed by the Commission after notice and opportunity for hearing "

costs were booked in December 2004 and cleared to account 102. A letter to the Federal Energy Regulatory Commission (the "FERC") for permission to clear account 102, Electric plant purchased or sold, was approved on May 10, 2005, Docket No. AC05-43-000.

ITEM 4.

In December 2003, PacifiCorp entered into a Precedent Agreement For Firm Transportation Service on Questar Pipeline Company's ("QPC") Currant Creek Lateral (Precedent Agreement) which outlined the terms of a requested Transportation Service Agreement (TSA) and construction of a natural gas pipeline and facilities necessary to connect the Currant Creek Power Project to QPC's Kern River Goshen interconnect receipt point. Upon completion of the pipeline construction, PacifiCorp and QPC entered into a 30-year TSA, with a term which began April 1, 2005. The TSA utilizes an Initial Monthly Reservation (IMR) charge of \$0.80977/decatherm based on usage of a minimum 190,000 decatherms per month. The reservation charges decrease to 90% of the IMR for years six through ten, 80% of the IMR for years eleven through fifteen and 70% of the IMR for years sixteen through thirty. The estimated monthly charge includes reimbursement for the construction costs of the pipeline and facilities totaling \$11.4 million and other executory fees such as monthly operation and maintenance costs and property taxes. The TSA is considered a capital lease of the facilities and PacifiCorp is committed to future minimum lease payments, including executory costs, of approximately \$1.8 million per year for PacifiCorp's fiscal years ending March 31, 2006 through 2010; \$1.7 million per year for fiscal years ending March 31, 2011 – 2015; \$1.5 million per year for fiscal years ending March 31, 2016 – 2020; and, \$1.3 million per year for fiscal years ending March 31, 2021 – 2035.

State regulatory commission authorization was not required.

ITEM 5.

Please refer to pages 424-425 of this Form 1, Transmission Lines Added During the Year.

ITEM 6.

For further discussion of other financing arrangements, see *Notes to the Financial Statements - Note 5 - Financing Arrangements* of this Form 1. For further discussion of the proposed sale of PacifiCorp, see Item 12 below.

Short-Term Debt

At March 16, 2006, PacifiCorp had \$155.0 million of commercial paper obligations outstanding, with maturities of less than one year. Authorizations for up to \$1.5 billion outstanding at any one time in commercial paper and other unsecured short-term debt are as follows:

Oregon Public Utility Commission, Docket No. UF-4120, Order No. 98-158, dated April 16, 1998.

Washington Utilities and Transportation Commission, Docket No. UE-980404, dated April 8, 1998.

Idaho Public Utility Commission, Case No. PAC-E-06-1, Order No. 29999, dated March 14, 2006.

Securities and Exchange Commission, Release No. 35-27851, dated May 28, 2004 and filed with the FERC on February 6, 2006 pursuant to 18 CFR 366.6(b).

PacifiCorp's short-term borrowings and certain other financing arrangements are supported by an \$800.0 million committed bank revolving credit agreement which was amended and restated in August 2005. Changes included an increase to 65.0% in the covenant not to exceed a specific debt-to-capitalization percentage, extension of the termination date to August 29, 2010 and an exclusion of the acquisition of PacifiCorp by MidAmerican as an event of default under the agreement. The interest rate on advances under this facility is generally based on the London Interbank Offered Rate (LIBOR) plus a margin that varies based on PacifiCorp's credit ratings. As of March 16, 2006, this facility was fully available and there were no borrowings outstanding.

IMPORTAL	IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)					

Long-Term Debt

For further discussion of long-term debt, see Notes to the Financial Statements - Note 6 - Long-Term Debt of this Form 1.

In June 2005, PacifiCorp issued \$300.0 million of its 5.25% Series of First Mortgage Bonds due June 15, 2035. PacifiCorp used the proceeds for the reduction of short-term debt, including the short-term debt used in December 2004 to redeem its 8.625% Series of First Mortgage Bonds due December 13, 2024 totaling \$20.0 million. State Commission authorizations for this issuance were as follows:

Oregon Public Utility Commission, Docket No. UF-4215, Order No. 05-258, dated May 9, 2005.

Washington Utilities and Transportation Commission, Docket No. UE-050556, Order No. 1, dated May 11, 2005.

Idaho Public Utilities Commission, Case No. PAC-E-05-5, Order No. 29787, dated May 17, 2005.

Preferred Stock

On June 15, 2005, PacifiCorp redeemed \$7.5 million of its \$7.48 No Par Serial Preferred Stock subject to the mandatory and optional redemption terms for this series.

Common Stock

On December 30, 2005, PacifiCorp issued 11,627,907 shares of its common stock to its parent company, PacifiCorp Holdings, Inc. ("PHI"), at a total price of \$125.0 million.

On September 30, 2005, PacifiCorp issued 11,617,101 shares of its common stock to PHI at a total price of \$125.0 million.

On July 21, 2005, PacifiCorp issued 11,737,090 shares of common stock to PHI in consideration of the capital contribution of \$125.0 million in cash made by PHI on June 30, 2005. State Commission authorizations for the issuances were as follows:

Oregon Public Utility Commission, Docket No. UF-4193 (1), Order No. 05-729, dated June 7, 2005.

Washington Utilities and Transportation Commission, Docket No. UE-050555, Order No. 1, dated May 11, 2005.

Idaho Public Utilities Commission, Case No. PAC-E-05-4, Order No. 29786, dated May 17, 2005.

Other Financing Arrangements

For the year ending December 31, 2005, PacifiCorp entered into three new standby letters of credit totaling \$56.7 million at December 31, 2005.

At December 31, 2005, PacifiCorp had \$517.8 million of standby letters of credit and stand by bond purchase agreements available to provide credit enhancement and liquidity support for variable-rate pollution-control revenue bond obligations. These committed bank arrangements expire periodically through the year ending March 31, 2011. As of March 1, 2006, PacifiCorp had amended all of these bank arrangements to allow for the acquisition of PacifiCorp by MidAmerican.

PacifiCorp's revolving credit agreement contains customary covenants and default provisions. PacifiCorp monitors these covenants on a regular basis to ensure that events of default will not occur, and as of December 31, 2005, PacifiCorp was in compliance with the covenants of its revolving credit agreement. PacifiCorp's other financing arrangements generally contain similar covenants, although the maximum permitted debt-to-capitalization ratio for some of the arrangements is 60.0%. PacifiCorp was also in compliance with these agreements at December 31, 2005. PacifiCorp anticipates seeking amendments to the covenants in these other financing agreements to conform them to the amended covenants in its revolving credit agreement.

ITEM 8.

The following table represents the estimated financial impact of the wage scale increases for the twelve months ended December 31, 2005:

Unions		Effective		ated Annual
Represented	% Increase (a)	Date(s)	Financia	al Impact (c)(d)
IBEW 57 Generation	3.41%	1/26/2005 & 7/26/2005	\$	1,080,521
IBEW 57 Power Delivery	3.45%	1/26/2005		2,281,187
IBEW 127 (WY) (b)	8.46%	3/26/2005 & 9/26/2005		2,924,532
UWUA 197 (Coos Bay, OR)	3.45%	1/26/2005 & 7/26/2005		44,127
IBEW 57 West Valley	1.80%	5/26/2005		27,855
IBEW 57 (Laramie, WY)	2.01%	6/26/2005		9,472
IBEW 125 (WA & OR)	4.28%	1/26/2005 & 9/26/2005		1,010,942
IBEW 659 (OR & CA)	3.58%	1/26/2005 & 7/26/2005		959,412
Total			\$	8,338,048

- (a) This percentage increase represents the increase of wages for all effective dates during the calendar year as compared to the wage scale of the prior effective period.
- (b) Includes a 5.1% retroactive pay adjustment that was due at contract ratification.
- (c) Some amounts may be reimbursed by joint owners of steam generating facilities.
- (d) The estimated annual impact is based on the time period from the effective date of the increase to the end of the calendar year.

ITEM 9.

For a discussion of other legal proceedings not described in this item, see *Notes to the Financial Statements – Note 8 – Commitments and Contingencies* of this Form 1, which is incorporated by reference herein.

INFORMATION REGARDING RECENT REGULATORY DEVELOPMENTS

Hydroelectric Relicensing and Decommissioning Actions

Several of PacifiCorp's hydroelectric plants are in some stage of the relicensing or decommissioning process with the FERC. The following summarizes the status of these projects.

Bear River hydroelectric project - (Bear River, Utah and Idaho)

The license issued by the FERC that was final in May 2004 included a requirement to evaluate decommissioning the 7.5 MW Cove Plant and associated project features (the "Cove Development"). In July 2005, a settlement agreement to remove the Cove Development was signed by PacifiCorp, state and federal agencies, and non-governmental agencies. Decommissioning of the Cove Development is contingent upon receiving an amended FERC license and removal order that is not materially inconsistent with the settlement agreement and other regulatory approvals. The settlement agreement was filed with the FERC in August 2005 as part of an application to amend the Bear River project license to provide for the removal of the Cove Development while continuing the operation of the other Bear River project plants. Decommissioning of the Cove Development is expected to be completed by the end of calendar 2006 for a total cost not to exceed \$3.9 million, excluding inflation.

Klamath hydroelectric project - (Klamath River, Oregon and California)

In February 2004, PacifiCorp filed with the FERC a final application for a new license to operate the 161.4 MW Klamath hydroelectric project. The FERC is scheduled to complete its required analysis by February 2007. PacifiCorp continues to participate in the mediated settlement discussions with state and federal agencies, Native American tribes and other stakeholders in an effort to reach a comprehensive agreement on project relicensing.

Condit hydroelectric project - (White Salmon River, Washington)

In September 1999, a settlement agreement to remove the 9.6 MW Condit hydroelectric project was signed by PacifiCorp, state and federal agencies, and non-governmental agencies. Under the original settlement agreement, removal was expected to begin in October 2006, for a total cost to decommission not to exceed \$17.2 million, excluding inflation. In early February 2005, the parties agreed to modify the settlement agreement so that removal will not begin until October 2008, for a total cost to decommission not to exceed \$20.5 million, excluding inflation. The settlement agreement is contingent upon receiving an amended FERC license and removal order that is not materially inconsistent with the amended settlement agreement and other regulatory approvals. PacifiCorp is in the process of acquiring all necessary permits in accordance with the terms and conditions of the amended settlement agreement.

Lewis River hydroelectric projects - (Lewis River, Washington)

PacifiCorp filed new license applications for the 136.0 MW Merwin and 240.0 MW Swift No. 1 hydroelectric projects in April 2004. An application for a new license for the 134.0 MW Yale hydroelectric project was filed with the FERC in April 1999. However, consideration of the Yale application was delayed pending filing of the Merwin and Swift No. 1 applications so that the FERC could complete a comprehensive environmental analysis.

On November 30, 2004, PacifiCorp executed a comprehensive settlement agreement with 25 other parties including state and federal agencies, Native American tribes, conservation groups, and local government and citizen groups to resolve among the parties issues related to the pending applications for new licenses for PacifiCorp's Merwin, Swift No. 1 and Yale hydroelectric projects. As part of this settlement agreement, PacifiCorp has agreed to implement certain protection, mitigation and enhancement measures prior to and during a proposed 50-year license period. However, these commitments are contingent on ultimately receiving a license from the FERC that is consistent with the settlement agreement and other required permits. The FERC is scheduled to complete its process and required analysis in order to be ready for a decision in July 2006.

Prospect hydroelectric project – (Rogue River, Oregon)

In June 2003, PacifiCorp submitted a final license application to the FERC for the Prospect Nos. 1, 2 and 4 hydroelectric projects, which total 36.8 MW. The FERC is expected to complete its required analysis and issue a new license before July 2006.

American Fork hydroelectric project – (American Fork River, Utah)

The FERC issued a surrender order for American Fork on August 4, 2004, which calls for project removal to be completed by December 2007. Removal costs for this 1.0 MW project are estimated to be approximately \$1.2 million, including process and permitting costs (adjusted for inflation). The parties have agreed that project removal will begin in September 2006, subject to the FERC and other regulatory approvals.

Powerdale hydroelectric project - (Hood River, Oregon)

In June 2003, PacifiCorp entered into a settlement agreement to remove the 6.0 MW Powerdale plant rather than pursue a new license, based on an analysis of the costs and benefits of relicensing versus decommissioning. Removal of the Powerdale plant and associated project features, which is subject to the FERC and other regulatory approvals, is projected to cost \$5.9 million (adjusted for inflation). The plant will continue to operate until its removal, which is scheduled to commence in 2010.

State Regulatory Actions

PacifiCorp pursues a regulatory program in all states that it serves, with the objective of keeping rates closely aligned to ongoing costs. The following discussion provides a state-by-state update, but does not address the possible effect of the proposed sale of ScottishPower's indirect interest in PacifiCorp to MidAmerican. In each state, the sale of PacifiCorp will require regulatory notification and/or approval. Although, PacifiCorp intends to pursue general rate increase requests as currently planned, management is unable to predict the impact, if any, of the proposed sale and the process of obtaining such approvals on the pending matters described below.

FERC FORM NO. 1 (E)	D. 12-96	D. 12-96)
---------------------	----------	-----------

PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4	
IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)				

Utah

In March 2006, PacifiCorp filed a general rate case with the Utah Public Service Commission (the "UPSC") for an increase of \$197 million annually, or an average increase of 17%, relating to continuing investments to serve Utah load and general inflation impacts.

In February 2005, the UPSC approved a stipulation settling the general rate case filed by PacifiCorp in August 2004. Under the stipulation, PacifiCorp was awarded an increase in prices of \$51.0 million annually, resulting in an average price increase of 4.7% and an allowed return on equity of 10.5%. The stipulation also included an effective date of March 1, 2005, which was a month earlier than the April 1, 2005 date required by Utah statute, resulting in a onetime benefit of \$4.3 million of additional revenues.

In November 2005, PacifiCorp filed a Power Cost Adjustment Mechanism ("PCAM") application. The PCAM provides for 90.0% recovery of actual power costs that exceed the amount in rates and a 100.0% refund of any over-collection of power costs. If approved, the PCAM will become effective after base rates are determined in PacifiCorp's next Utah general rate case.

Senate Bill 26 was signed into law in February 2005. This bill establishes rules and a mandatory process for the solicitation and evaluation of bids to procure significant energy resources. It also provides PacifiCorp with the opportunity to obtain advance approval from the UPSC of a resource decision and an assurance of the recovery of costs associated with the resource. Senate Bill 26 also establishes a voluntary process for utilities to obtain advance approval of certain other resource commitments and investment decisions.

Oregon

In February 2006, PacifiCorp filed a general rate case with the Oregon Public Utility Commission (the "OPUC") for an increase of \$112 million annually, or an average increase of 13.2%, relating to cost increases in fuel, investments in generation, transmission and distribution infrastructure, and general operating expenses.

In September 2005, Oregon's Governor signed into law Senate Bill 408. This legislation is intended to address differences between income taxes collected by Oregon public utilities in retail rates and actual taxes paid by the utilities or consolidated groups in which utilities are included for income tax reporting purposes. This legislation authorizes an automatic adjustment to rates based on the taxes paid to governmental entities on or after January 1, 2006. The OPUC adopted a temporary rule in September 2005 to establish filing requirements for an annual tax report mandated by Senate Bill 408. The definitions adopted in the temporary rule would allocate a share of individual taxable losses of affiliate companies to the utility even when the consolidated tax group pays more taxes than the utility collects in retail rates. In October 2005, PacifiCorp filed a petition requesting the OPUC to repeal its temporary rule. PacifiCorp is actively participating in the rulemaking process for adopting permanent rules required by Senate Bill 408. PacifiCorp expects that the permanent rules will be issued during the fiscal quarter ending September 30, 2006.

In September 2005, the OPUC issued an order granting a general rate increase of \$25.9 million, or an average increase of 3.2%, effective October 2005. PacifiCorp filed its general rate case in November 2004, and following four partial stipulations with participating parties, PacifiCorp's requested revenue requirement increase was \$52.5 million. The OPUC's order reduced PacifiCorp's revenue requirement by \$26.6 million based on the OPUC's interpretation of Senate Bill 408. In October 2005, PacifiCorp filed with the OPUC a motion for reconsideration and rehearing of the rate order generally on the basis that the tax adjustment was not made in compliance with applicable law. With the motion, PacifiCorp also filed a deferred accounting application with the OPUC to track revenues related to the disallowed tax expenses. The OPUC granted PacifiCorp's motion for reconsideration and rehearing in December 2005 and will reconsider whether Oregon Senate Bill 408 applies to the general rate case and, it if does, whether the tax adjustment ordered by the OPUC results in rates that are unconstitutional. A hearing and submissions of written briefs are scheduled to occur through May 2006.

In April 2006, long-term special contracts for PacifiCorp's Klamath basin irrigation customers will expire. Under the existing contracts, customers receive power at rates equaling less than one-tenth of PacifiCorp's average retail rates charged to other customers on general irrigation tariffs. The rates that these Klamath basin customers will pay after the expiration of their special contract were a contested issue in PacifiCorp's last general rate proceeding. The OPUC separated the rate-standard and rate-setting issues from the general rate proceeding and required parties to file legal briefs on the appropriate rate standard to apply to these customers. In November 2005, the OPUC issued an order stating that the same "just and reasonable" standard that applies to all of PacifiCorp's retail customers also applies to irrigation customers in the Klamath basin. A procedural schedule for the evidentiary rate-setting portion of

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
i '	(1) X An Original	(Mo, Da, Yr)		
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4	
IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)				

the proceeding has been established. An order is expected in April 2006. Legislation enacted in 2005 by the Oregon Legislative Assembly and Governor Kulongoski limits increases in rates for the Klamath Basin customers to 50.0% per year. The legislation states that the full cost of providing the rate credits will be spread among other PacifiCorp customers.

In February 2005, PacifiCorp filed an application for deferral of higher power costs in calendar 2005 due to continuing poor hydroelectric conditions. PacifiCorp sought deferral of these costs to track for future recovery in rates. In May 2005, this deferral application was suspended to allow parties to focus on the power cost adjustment mechanism filed by PacifiCorp in April 2005. If approved, the proposed power cost adjustment mechanism will address recovery lag on Oregon's share of PacifiCorp's total net power cost and the associated volatility resulting from such factors as hydroelectric, natural gas and load variability. The proposed power cost adjustment mechanism is designed to be an enduring mechanism that more fairly balances risk between customers and shareholders. Any approved power cost adjustment mechanism could result in the creation of related regulatory assets and liabilities that will capture under- and over-recoveries, respectively. A full procedural schedule including testimony, a hearing, and legal briefs has been completed and awaiting the Commission's order.

Wyoming

In February 2006, the Wyoming Public Service Commission ("the WPSC") orally approved an agreement settling the general rate case filed by PacifiCorp in October 2005 and a separate December 2005 request by PacifiCorp to recover increased costs of net wholesale purchased power used to serve Wyoming customers. The settlement provides for a \$15.0 million revenue increase effective March 1, 2006, an additional \$10.0 million revenue increase effective July 1, 2006, a PCAM and an agreement by the parties to support a forecast test year in the next general rate case application.

Washington

In May 2005, PacifiCorp filed a general rate case request with the Washington Utilities and Transportation Commission (the "WUTC") for approximately \$39.2 million. PacifiCorp filed rebuttal testimony in December 2005 that decreased the originally filed amount by \$6.6 million, for an updated request of \$32.6 million. Hearings on the updated request took place in January and February 2006. If approved by the WUTC, customer rates would increase by 14.9% in April 2006. As part of that proceeding, PacifiCorp is also requesting to recover \$8.3 million in hydroelectric costs deferred through the period ending December 31, 2005. PacifiCorp is proposing that the rate treatment of the current low hydroelectric trend and power cost volatility be recovered following the general rate case proceedings through a proposed PCAM.

Idaho

In July 2005, the Idaho Public Utility Commission (the "IPUC") issued an order approving a settlement of PacifiCorp's general rate case filed in January 2005 and granting a stipulated rate increase of \$5.75 million, or an average increase of 4.8%, effective September 16, 2005. On that date, unrelated pre-existing surcharges expired, so the net effect to customers of the \$5.75 million base increase was an increase in rates of \$2.1 million annually, or an average increase of 1.7%.

California

In November 2005, PacifiCorp filed a general rate case with the California Public Utilities Commission (the "CPUC") for an increase of \$11.0 million annually, or an average increase of 15.6% related to increasing costs, including power costs and operating expenses, as well as significant needed capital investments.

PacifiCorp's application also requests the implementation of an Energy Cost Adjustment Clause ("ECAC"), which would allow for annual rate adjustments for changes in the level of net power costs, and a Post Test-Year Adjustment Mechanism ("PTAM"), which would allow annual rate adjustments for changes in operating costs and plant additions. The proposed ECAC and PTAM would operate outside the context of traditional general rate cases.

PacifiCorp also serves customers in California that fall under long-term special contracts for Klamath basin irrigation customers described above. In January 2006, PacifiCorp served notice to the CPUC of its intent to reset the rates for these customers to standard irrigation rates upon expiration of the special contracts in April 2006. After a formal protest by the irrigation customers, PacifiCorp and the irrigation customers agreed upon and presented a joint proposal for a 4-year transition to standard irrigation rates to the CPUC, which is scheduled to rule on the proposal prior to the expiration of the special contracts.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report

PacifiCorp	(2) A Resubmission	03/20/2006	2005/Q4		
IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)					

Multi-State Process

The Multi-State Process commenced in April 2002 and was a collaborative process with stakeholders from five of the six states PacifiCorp serves. The project's focus was to design, develop and implement a cost allocation methodology that would achieve a more permanent consensus on each state's responsibility for the costs and benefits of PacifiCorp's existing assets, enabling PacifiCorp to recover the cost of future investments and providing states with the ability to independently implement state energy policy objectives.

A number of collaborative meetings and conferences occurred during 2002 and 2003, which concluded in the development of a cost allocation methodology proposal, referred to as the "Protocol." The Protocol was filed with each of the state commissions in Utah, Oregon, Wyoming and Idaho in September 2003. Following discussions with all parties, the proposal was further refined and re-submitted to each of the state commissions as the "Revised Protocol."

During June 2004 through November 2004, settlement discussions occurred in each of the above mentioned states, agreements were reached with parties and hearings or oral arguments took place. Final ratification of the Revised Protocol was achieved in March 2005, and each of the state commissions in Utah, Oregon, Wyoming and Idaho issued orders approving and accepting the use of the Revised Protocol cost allocation methodology for future rate setting in those states. The Revised Protocol cost allocation methodology forms the basis of the Washington general rate case filed in May 2005 and the California general rate case filed in November 2005. These proceedings are ongoing, with Orders anticipated in 2006.

ITEM 10.

Related-Party Transactions

For further discussion of related party transactions, see *Notes to the Financial Statements - Note 4 - Related-Party Transactions* of this Form 1.

On May 16, 2005, the SEC approved PacifiCorp's participation in a captive insurance program recently established by ScottishPower for its group companies. The captive insurance company, Dornoch International Insurance Limited ("DIIL"), is an indirect wholly owned consolidated subsidiary of ScottishPower. DIIL covers all or significant portions of the property damage and liability insurance deductibles in many of PacifiCorp's current policies, as well as activities that commercial insurance industry carriers will no longer cover, such as overhead distribution and transmission line property damage. PacifiCorp has no equity interest in DIIL and has no obligation to contribute equity or loan funds to DIIL. Premium amounts are established to cover loss claims, administrative expenses and appropriate reserves, but otherwise DIIL is not operated to generate profits.

According to the terms of PacifiCorp's offer letter to its Senior Vice President, General Counsel and Corporate Secretary, Andrew Haller, PacifiCorp made a \$200,000 loan to Mr. Haller on May 21, 2001 for the repayment of obligations to his former employer. At December 31, 2005, the outstanding loan balance was \$54,394.96, including accrued interest. To repay the loan, Mr. Haller is required to make two remaining annual payments of principal and interest (accruing the annual rate of 4.74%) in year 2006 and 2007.

Employment Agreements

On December 20, 2005, PacifiCorp's President and Chief Executive Officer, Judith A. Johansen, signed an amendment to her existing employment agreement with PacifiCorp and Scottish Power plc ("ScottishPower"), PacifiCorp's ultimate parent company. The amendment:

- states that Ms. Johansen will terminate her employment with PacifiCorp and resign as an officer and director of PacifiCorp and all affiliates, including ScottishPower, effective immediately following the closing of the sale of PacifiCorp to MidAmerican Energy Holdings Company;
- restates her waiver of participation in the PacifiCorp Executive Severance Plan:
- provides for the cash retention award associated with PacifiCorp's sale to MidAmerican previously approved by ScottishPower's Remuneration Committee, as described below:

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
·	(1) X An Original	(Mo, Da, Yr)	.		
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4		
IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)					

- modifies her Annual Incentive Plan ("AIP") terms consistent with recent changes to the AIP terms of other PacifiCorp named executive officers, as described below;
- clarifies the respective obligations of PacifiCorp and ScottishPower to her after the termination of her employment;
- provides that upon termination and assuming compliance by her with the terms of the Employment Agreement, she will receive severance benefits equal to 12 months of salary, bonus and vehicle allowance, plus enhanced change in control benefits under the PacifiCorp Supplemental Executive Retirement Plan;
- provides for a gross-up payment by PacifiCorp to Ms. Johansen to cover any excise tax payable in connection with separation payments, as well as certain health insurance and other benefits following her employment termination; and
- adds certain customary obligations relating to non-disparagement and conflicts of interest.

On May 22, 2005 the ScottishPower Remuneration Committee, in light of the expected timetable for obtaining regulatory approvals of PacifiCorp's sale to MidAmerican, approved a cash retention award for PacifiCorp's Chief Executive Officer, Judith Johansen, equal to one times base salary, which is contingent on the closing of PacifiCorp's sale to MidAmerican and also on Ms. Johansen's continued employment and her satisfactory performance of duties in the period through the sale's closing. Ms. Johansen will receive 80.0% of the retention award upon the closing of the sale and the remaining 20.0% of the award 365 days from the date of the closing, provided there have been no breach of warranty claims against ScottishPower or PHI under the Stock Purchase Agreement.

On October 4, 2005, PacifiCorp entered into a Compromise Agreement with its parent company, PHI, and its former Senior Vice President and Director, Michael J. Pittman, that supersedes Mr. Pittman's employment agreement with PacifiCorp and ScottishPower and documents the terms of his separation from the companies following a recent ScottishPower corporate restructuring that eliminated his position. Under his employment agreement, Mr. Pittman was entitled to severance benefits equal to 12 months of salary, bonus and vehicle allowance and 6 months of continued health insurance coverage. The Compromise Agreement supplements these benefits with enhancements generally comparable to those payable under the PacifiCorp Executive Severance Plan for a termination following a change in control of PacifiCorp, including an additional 12 months of salary, bonus and vehicle allowance and health insurance coverage for an additional 18 months. ScottishPower has agreed to reimburse PacifiCorp for the cost of the supplemental benefits provided by the Compromise Agreement.

On May 23, 2005, PacifiCorp's Compensation Committee approved a \$6.0 million pool to be used for retention incentives during the period prior to completion of the sale of PacifiCorp to MidAmerican. PacifiCorp's Chief Executive Officer selected participants, consisting of PacifiCorp senior management and other employees determined to be critical to PacifiCorp prior to completion of the sale, and determined the amounts and terms of retention awards, with Compensation Committee approval. Each participant was required to sign a confidentiality and retention agreement. On August 29, 2005, certain of PacifiCorp's named executive officers entered into agreements with ScottishPower for awards under the Transaction Incentive Program. The agreement signed by each participating named executive officer has two principal components:

- A modification of the executive officer's eligibility under PacifiCorp's Annual Incentive Plan ("AIP") for the fiscal year ending March 31, 2006. Participating executive officers have agreed that their AIP awards, as funded by PacifiCorp, will no longer be based on multiple measurement criteria (some of which provided for a pro rata payout), but instead will be based on a single measurement, PacifiCorp's performance against its budget (which will not be subject to a pro rata payout). However, ScottishPower's Chief Executive Officer retains the discretion to approve or modify any AIP payout to these officers, subject to review by ScottishPower's Remuneration Committee.
- <u>Terms of Transaction Incentive Program Award</u>. Each participating executive officer is eligible for a transaction incentive award in an amount equal to the executive officer's base salary (as adjusted for any existing retention agreement), payable as follows:
 - 1. 25% of the award was payable within one month of execution and delivery of the award agreement;
 - 2. 50% of the award is payable three months after the closing of PacifiCorp's sale to MidAmerican at \$5.1 billion as set

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
i i	(1) X An Original	(Mo, Da, Yr)			
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4		
IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)					

forth in the Stock Purchase Agreement governing the transaction, provided there are no claims by MidAmerican against ScottishPower; and

3. 25% of the award is payable 12 months after the closing, again as long as there are no claims by MidAmerican against ScottishPower.

Continued employment by PacifiCorp, observance of confidentiality obligations and satisfactory performance in support of the transaction until the sale's completion are conditions to the executive officer's receipt of these payments. Ultimate determinations of award eligibility will be made by ScottishPower's Chief Executive Officer, subject to review by the Remuneration Committee.

PacifiCorp and ScottishPower also finalized the terms of Transaction Incentive Program awards to other participants. The terms and conditions of these awards are generally similar to those of the named executive officer awards, but in some cases include satisfactory achievement of specified employment objectives.

The summary of the Transaction Incentive Program award agreements for PacifiCorp named executive officers is qualified in its entirety by reference to the terms of the form of such agreement, which is included as an exhibit hereto and incorporated by reference herein.

Name and Title	Transaction Incentive Program Award		
Andrew P. Haller Senior Vice President, General Counsel and Corporate Secretary	\$	348,503	
Richard D. Peach Chief Financial Officer	\$	250,000 (a)	
A. Richard Walje Executive Vice President	\$	330,811	
M atthew R. Wright Executive Vice President	\$	305,292	

(a) Adjusted for existing retention agreement.

On May 26, 2005, PacifiCorp's Compensation Committee modified participation in PacifiCorp's Executive Severance Plan to provide that certain members of PacifiCorp senior management, including executive officers Andrew Haller, Andrew MacRitchie, Richard Peach, Stan Watters and Matthew Wright, will be eligible for one times annual compensation general severance benefits and two times annual compensation change-of-control severance benefits.

On May 2, 2005, PacifiCorp's Chief Financial Officer, Richard D. Peach, entered into new compensation arrangements with PacifiCorp and Scottish Power UK plc ("SPUK"), an indirect wholly owned subsidiary of ScottishPower, PacifiCorp's ultimate parent company. Mr. Peach continues to report to PacifiCorp's Chief Executive Officer, Judith Johansen, but his current international assignment to PacifiCorp from SPUK changed to permanent employment by PacifiCorp when he obtained U.S. permanent resident status. Also effective May 1, 2005, Mr. Peach's full international assignment benefits have ceased, but he will continue to receive transition benefits, including foreign service premium payments, cost-of-living adjustment payments and housing and utilities allowances for up to 18 months.

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)					

Sale of PacifiCorp

On May 23, 2005, ScottishPower and PHI, PacifiCorp's direct parent company, executed a Stock Purchase Agreement (the "Stock Purchase Agreement") providing for the sale of all PacifiCorp common stock to MidAmerican for a value of approximately \$9.4 billion, consisting of approximately \$5.1 billion in cash plus approximately \$4.3 billion in net debt and preferred stock, which will remain outstanding at PacifiCorp. MidAmerican is based in Des Moines, Iowa, and is a privately owned global provider of energy services. Through its energy-related business platforms - CalEnergy, CE Electric UK, Kern River Gas Transmission Company, Northern Natural Gas Company and MidAmerican Energy Company - MidAmerican provides electric and natural gas services to 5 million customers worldwide.

The closing of the sale of PacifiCorp is subject to a number of conditions, including ScottishPower shareholder consent and regulatory notification and/or approvals from the FERC, the Department of Justice or the Federal Trade Commission, the Federal Communications Commission, the Nuclear Regulatory Commission and the public utility commissions in the states of Utah, Oregon, Wyoming, Washington, Idaho and California, as well as consents under existing third-party agreements. The Energy Policy Act of 2005 enacted in August 2005 includes a provision repealing the Public Utility Holding Company Act of 1935. The repeal took effect on February 8, 2006, prior to the closing of the sale of PacifiCorp; as a result, approval of the transaction by the Securities and Exchange Commission (the "SEC") is not required. ScottishPower shareholders approved the sale on July 22, 2005. The Department of Justice and the Federal Trade Commission completed their review of MidAmerican's acquisition of PacifiCorp in August 2005. The FERC and the Nuclear Regulatory Commission formally approved MidAmerican's acquisition of PacifiCorp in December 2005.

Pending satisfaction of the closing conditions, which is expected to occur prior to March 31, 2006, the Stock Purchase Agreement requires ScottishPower to cause PacifiCorp to operate its business in the ordinary course consistent with past business practice. The Stock Purchase Agreement also requires ScottishPower to obtain MidAmerican's prior approval to certain actions taken by PacifiCorp beyond limits specified in the Stock Purchase Agreement, including:

- borrowings or debt issuances;
- capital expenditures;
- construction or acquisition of new generation, transmission or delivery facilities or systems, other than as budgeted or necessary to fulfill regulatory commitments (for example, the construction of the Currant Creek and Lake Side Power Plants is permitted to proceed as planned);
- unbudgeted significant acquisitions or dispositions;
- modifications to material agreements with regulators;
- issuance or sale of any capital stock to any person, other than PHI in certain circumstances;
- · adoption or amendment of employee benefit plans or material increases to employee compensation; and
- payment of dividends to PHI.

Although PacifiCorp intends to, and the Stock Purchase Agreement requires ScottishPower to cause PacifiCorp to, operate its business in the normal course pending the sale of PacifiCorp to MidAmerican, some of the agreements and restrictions in the Stock Purchase Agreement may affect how PacifiCorp manages its affairs.

While the sale of PacifiCorp is pending and the Stock Purchase Agreement is in effect, ScottishPower and PHI have agreed to make common equity contributions to PacifiCorp of \$125.0 million at the end of each quarter in fiscal year 2006 and \$131.25 million at the end of each quarter in fiscal year 2007. If the sale is completed, MidAmerican will refund to PHI the amount of required fiscal year 2007 common equity contributions as an increase to the purchase price. On December 30, 2005, September 30, 2005 and June 30, 2005, PHI made quarterly common equity contributions of \$125.0 million as required by the Stock Purchase Agreement.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
·	(1) X An Original	(Mo, Da, Yr)	1		
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4		
IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)					

Until completion of the sale (or termination of the Stock Purchase Agreement), a joint executive committee with an equal number of representatives from ScottishPower and MidAmerican is facilitating the transactions contemplated in the Stock Purchase Agreement (including the process of obtaining required consents and approvals), integration planning and strategic development and will develop recommendations concerning the structure and the general operation of PacifiCorp prior to the closing. If ScottishPower completes the sale of PacifiCorp, MidAmerican will cause the election of its own nominees as directors of PacifiCorp and influence the management and policies of PacifiCorp following the sale.

The Stock Purchase Agreement may be terminated prior to completion by mutual agreement of MidAmerican and ScottishPower or otherwise in specified circumstances, including (i) material breach of the representations, warranties or covenants of the parties and (ii) the sale not being completed by May 23, 2006; however, if federal or state approvals have not been obtained but all other conditions have been fulfilled or are capable of being fulfilled as of May 23, 2006, either ScottishPower or MidAmerican may elect to extend the term of the Stock Purchase Agreement until February 17, 2007.

In February and March 2006, the state commissions in all six states where PacifiCorp has retail customers approved PacifiCorp's sale to MidAmerican. The approvals were conditioned on a number of regulatory commitments, including expected financial benefits in the form of reduced corporate overhead and financing costs, certain mid- to long-term capital and other expenditures of significant amounts and a commitment not to seek utility rate increases attributable solely to the change in ownership. The capital and other expenditures proposed by MidAmerican and PacifiCorp include:

- Approximately \$812.0 million in investments (generally to be made over several years following the sale and subject to
 subsequent regulatory review and approval) in emissions reduction technology for PacifiCorp's existing coal plants, which,
 when coupled with the use of reduced emissions technology for anticipated new coal-fueled generation, is expected to result
 in significant reductions in emissions rates of sulfur dioxide, nitrogen oxide and mercury and to avoid an increase in the
 carbon dioxide emissions rate; and
- Approximately \$519.5 million in investments (to be made over several years following the sale and subject to subsequent regulatory review and approval) in PacifiCorp's transmission and distribution system that would enhance reliability, facilitate the receipt of renewable resources and enable further system optimization.

PacifiCorp presently expects that annual capital expenditures of at least \$1.0 billion will be required for at least the next five years, including the investments described above, and PacifiCorp expects to seek recovery of these costs in retail rates in the future. This level of spending is dependent upon the availability of funding on reasonable terms and conditions. If market conditions are not favorable it may be necessary to postpone certain planned capital expenditures or take other actions.

The commitments approved by the state commissions also include credits that will reduce retail rates generally through 2010 to the extent that PacifiCorp does not achieve identified cost reductions or demonstrate mitigation of certain risks to customers. The maximum potential value of these rate credits to customers in all six states is \$142.5 million. PacifiCorp and MidAmerican have made an additional commitment to the state commissions that, following the sale and through December 31, 2008, PacifiCorp will not make any dividends to MidAmerican or its affiliates that will reduce PacifiCorp's common equity capital below 48.25% of PacifiCorp's total capitalization without prior commission approval. After 2008, the required minimum level of common equity declines annually to 44.0% after December 31, 2011.

Integrated Resource Plan

PacifiCorp filed its 2004 Integrated Resource Plan ("IRP") with the relevant state commissions in January 2005. PacifiCorp received acknowledgement of the IRP in Washington, Idaho, and Oregon. In Utah, the IRP was acknowledged except for the Action Plan component. The Action Plan will be considered as part of the Request for Proposal ("RFP") approval process under new state energy resource procurement regulations. Oregon acknowledged the IRP with exceptions and new analytical requirements for PacifiCorp's next IRP. No action is required in Wyoming or California.

PacifiCorp released an update to the 2004 IRP in November 2005 that modified the type of future generation resources preferred by PacifiCorp and defers the need for a significant new generation resource from 2009 to 2012.

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)				

Requests for Proposals

RFP 2003B - PacifiCorp's 2003 Integrated Resource Plan identified 1,400 MW of renewable resources as part of a least-cost portfolio of resources to meet PacifiCorp's growing demand over a 10-year period. PacifiCorp issued a Renewable Request for Proposals in February 2004 for up to 1,100 MW of economic renewable resources for PacifiCorp's system, which would become available in phases through calendar 2010. In May 2005, PacifiCorp entered into a 64.5 MW power purchase agreement in southeastern Idaho, which reached commercial operation in February 2006. In December 2005, PacifiCorp signed a 20 year Power Purchase Agreement with AMP Resources for 42MW from Cove Fort, a geothermal project in Utah. PacifiCorp will issue an amendment to the 2003B RFP in March 2006 to solicit new and existing updates for renewable proposals under the 2003B RFP for projects to be on line prior to December 31, 2007.

RFP 2012 (formerly known as RFP 2009) - As a consequence of the update to the 2004 IRP, PacifiCorp has suspended the 2009 Request for Proposal ("RFP"). PacifiCorp will work with the state commissions and the independent evaluator required to participate in the resource procurement process to identify the best way to procure the generation resource need identified for 2012. On January 30, the Utah Commission issued a scheduling order (Docket 05-035-47) for the RFP 2012. Any revision to the procurement process would remain subject to applicable commission acceptance.

<u>Demand-side RFP</u> - A demand-side management RFP covering all six states where PacifiCorp operates was issued in September 2005 requesting proposals for 80 MW or more of load-control resources and up to 1,752,000 MWh of conservation resources. The bids were received in October 2005. Evaluations are expected to be completed by April 2006, at which time PacifiCorp will begin filing tariffs with the state commissions. Tariff filings will continue after April 2006 until all new programs have been implemented.

Grid West and Regional Transmission Projects

In November 2005, the Bonneville Power Administration (the "BPA") withdrew future funding support for Grid West, a non-profit corporation established by PacifiCorp and other western utilities as the platform for a proposed independent regional transmission entity that would manage certain operational functions of the transmission grid and plan for necessary expansion. The BPA's withdrawal resulted from the rejection by the Grid West interim board of directors' of certain terms BPA proposed as a condition of its continued participation. In January 2006, British Columbia Transmission Corporation determined that it also would discontinue funding Grid West due to uncertainties associated with BPA's withdrawal. In February 2006, Sierra Pacific Power Company recommended to the Nevada Public Utilities Commission that they join WestConnect. The final decision will be based on the response of the Nevada commission.

The remaining utilities (Avista Corporation, Idaho Power Company, NorthWestern Energy, PacifiCorp and Portland General Electric) are reviewing the costs and impacts of moving forward.

PacifiCorp expects to continue its participation in support of the establishment of a regional transmission entity, with the ultimate decision to participate subject to a demonstration of net benefits to its customers.

Fair Value of Derivatives

Wholesale energy sales and purchase contracts are utilized primarily to balance PacifiCorp's physical excess or shortage of net electricity for future time periods. When forward market prices are higher than contract prices, wholesale energy sales contracts will have unrealized losses and wholesale purchase contracts will have unrealized gains. The opposite is true when forward market prices are lower than contract prices. Unrealized losses and gains will reverse in future periods when the contracts settle at contract prices and do not result in cash collections or payments other than in meeting cash collateral requirements.

The following table shows the changes in the fair value of energy-related contracts subject to the requirements of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended, from December 31, 2004 to December 31, 2005 and quantifies the reasons for the changes.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) X An Original	(Mo, Da, Yr)		
PacifiCorp	(2) A Resubmission	03/20/2006	2005/Q4	
IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)				

(M illions of dollars)		Net (Liability)	N	gulatory et asset oility) (c)
Fair value of contracts outstanding at December 31, 2004 Contracts realized or otherwise settled during the period	\$	(271.3) (34.3)	\$	277.9 35.1
Changes in fair values attributable to changes in valuation techniques and assumptions (a)		(52.7)		52.7
Other changes in fair values (b) Fair value of contracts outstanding at December 31, 2005	\$	141.6	<u> </u>	(92.3)

- (a) Effective March 31, 2005, PacifiCorp adjusted its estimate of the period covered by market quotes from three years to six years due to the increased availability of verifiable market quotations. This change had the effect of decreasing the fair value of non-trading contracts by \$52.7 million, offset by an increase in regulatory net assets of the same amount.
- (b) Other changes in fair values include the effects of changes in market prices, inflation rates and interest rates, including those based on models, on new and existing contracts.
- (c) Net unrealized losses (gains) on contracts that have received regulatory approval for recovery in rates are included as a regulatory net asset (liability).

The fair value of derivative instruments is determined using forward price curves. Forward price curves represent PacifiCorp's estimates of the prices at which a buyer or seller could contract today for delivery or settlement of a commodity at future dates. PacifiCorp bases its forward price curves upon market price quotations when available, and internally developed and commercial models with internal and external fundamental data inputs when market quotations are unavailable. In general, PacifiCorp estimates the fair value of a contract by calculating the present value of the difference between the prices in the contract and the applicable forward price curve. Price quotations for certain major electricity trading hubs are generally readily obtainable for the first six years and therefore PacifiCorp's forward price curves for those locations and periods reflect observable market quotes. However, in the later years or for locations that are not actively traded, PacifiCorp must develop forward price curves. For short-term contracts at less actively traded locations, prices are modeled based on observed historical price relationships with actively traded locations. For long-term contracts extending beyond six years, the forward price curve is based upon the use of a fundamentals model (cost-to-build approach) due to the limited information available. Factors used in the fundamentals model include the forward prices for the commodities used as fuel to generate electricity, the expected system heat rate (which measures the efficiency of electricity plants in converting fuel to electricity) in the region where the purchase or sale takes place and a fundamental forecast of expected spot prices based on modeled supply and demand in the region. The assumptions in these models are critical since any changes to the assumptions could have a significant impact on the fair value of the contract. Contracts with explicit or embedded optionality are valued by separating each contract into its physical and financial forward and option components. Forward components are valued against the appropriate forward price curve. The optionality is valued using a modified Black-Scholes model or a stochastic simulation (Monte Carlo) approach. Each option component is modeled and valued separately using the appropriate forward price curve.

PacifiCorp's valuation models and assumptions are continuously updated to reflect current market information, and evaluations and refinements of model assumptions are performed on a periodic basis.

The following table shows summarized information with respect to valuation techniques and contractual maturities of PacifiCorp's energy-related contracts qualifying as derivatives under SFAS No. 133 as of December 31, 2005.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report			
·	(1) X An Original	(Mo, Da, Yr)	1			
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4			
IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)						

	Fair Value of Contracts at Period-End				
(Millions of dollars)	Maturity Less Than 1 Year	Maturity 2-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	Total Fair Value
Trading:					
Values based on quoted market prices from third-party sources	\$ (0.2)	\$ -	\$ -	\$ -	\$ (0.2)
Values based on models and other valuation methods					<u> </u>
Total trading	\$ (0.2)	\$ -	<u>\$</u> -	<u> </u>	\$ (0.2)
Non-trading:					
Values based on quoted market prices from third-party sources	\$ 4.0	\$ 23.8	\$ 14.3	\$ 2.4	\$ 44.5
Values based on models and other valuation methods	166.1	161.0	21.1	(250.9)	97.3
Total non-trading	\$ 170.1	\$ 184.8	\$ 35.4	\$ (248.5)	\$ 141.8

Standardized derivative contracts that are valued using market quotations are classified as "values based on quoted market prices from third-party sources." All remaining contracts, which include non-standard contracts and contracts for which market prices are not routinely quoted, are classified as "values based on models and other valuation methods." Both classifications utilize market curves as appropriate for the first six years.

ITEM 13.

For additional Officer and Director changes please refer to page 104, Officers and page 105, Directors of this Form 1.

On January 12, 2006, ScottishPower announced that Philip Bowman will succeed Ian Russell as ScottishPower's Group Chief Executive effective January 16, 2006. As a result, Mr. Russell, who was Chairman of PacifiCorp's Board of Directors, departed his position as a director of PacifiCorp effective January 16, 2006.

On December 30, 2005, PacifiCorp announced the appointment of Stephen Dunn to its Board of Directors and Compensation Committee. Mr. Dunn is the Director of Human Resources and Communications for ScottishPower, PacifiCorp's ultimate parent company. On November 29, 2005, PacifiCorp's Board of Directors elected Mr. Dunn to fill the vacancy created by the resignation from that board of ScottishPower's previous Director of Human Resources.

On September 7, 2005, Group Director of Human Resources, Michael J. Pittman, resigned as an officer and director of PacifiCorp.

FOOTNOTE DATA						

Schedule Page: 110 Line No.: 57 Column:

Of the \$71.9 million balance in account 165 Prepayments, \$41.9 million represents prepaid income taxes for the period ending December 31, 2004 paid to PacifiCorp Holdings, Inc. ("PHI"), the parent company of PacifiCorp.

Schedule Page: 110 Line No.: 82 Column:

PacifiCorp keeps its accounting records on a fiscal-year basis for Securities Exchange Commission (the "SEC") financial reporting purposes. The fiscal year end is March 31st. Annual fiscal year-end tax adjustments are performed in March. These adjustments result in larger changes to various tax accounts between "current-year end of quarter balances" and "prior year end balances" in the first quarter FERC 3-Q (first quarter of the calendar year) report than in subsequent quarters.

	FOOTNOTE DATA		

Schedule Page: 112 Line No.: 11 Column:

To ensure Account 216.1 only includes Unappropriated Undistributed Retained Earnings of existing subsidiaries, \$669.4 million was transferred from Account 216.1 to Account 216 following a review of 18 CFR 101.216 and 216.1. Although this transfer between accounts has no impact on total retained earnings (the sum of Accounts 215, 215.1, 216 and 216.1), PacifiCorp has determined that a transfer from Account 216.1 should be made when a subsidiary is transferred, sold, dissolved or liquidated, even in the absence of a dividend or other formal distribution. This approach is consistent with debits or credits made to Account 123.1 (Investment in Subsidiary Companies) when subsidiaries are transferred, sold, dissolved or liquidated.

The \$669.4 million transferred to Account 216 primarily represents a debit balance in Account 216.1 associated with PacifiCorp Group Holdings Company ("PGHC"), a former subsidiary of PacifiCorp that was transferred to PacifiCorp's parent company, PacifiCorp Holdings, Inc. ("PHI"), in 2002. Substantially all of the PGHC debit balance resulted from previous returns of capital from PGHC to PacifiCorp that had been credited to Account 216 and debited to Account 216.1 by the amount of each distribution when neither account should have been affected.

Only Accounts 216 and 216.1 were affected by the transfer, and total retained earnings was not affected. Furthermore, this transfer had no effect on PacifiCorp's Statement of Income or Statement of Cash Flows and, except for the balances of Accounts 216 and 216.1, had no effect on the Comparative Balance Sheet or Statement of Retained Earnings. The following table represents account balances for 2002, 2003 and 2004 as if Accounts 216.1 and 216 had reflected the transfer of PGHC to PHI, compared to the actual as-reported account balances in those years.

Schedule Page: 114 Line No.: 2 Column: h

In July 2003, the Emerging Issues Task Force ("EITF") issued EITF No. 03-11. Effective January 1, 2004, PacifiCorp adopted EITF No. 03-11, which provides guidance on whether to report realized gains or losses on physically settled derivative contracts not held for trading purposes on a gross or net basis and requires realized gains or losses on derivative contracts that do not settle physically to be reported on a net basis. The adoption of EITF No. 03-11 resulted in PacifiCorp's netting certain contracts that were previously recorded on a gross basis, which reduced Sales for Resale and Purchased Power. Since PacifiCorp has a fiscal year end of March 31, the implementation of EITF 03-11 resulted in a reclassification of \$397.7 million at March 31, 2004 for the fiscal year then ended (first quarter of the calendar year). Consequently, since FERC reporting is based on a calendar year, the financial information reported in the following accounts contains the impact of the adjustment for the 12-month period ending March 31, 2004 as opposed to just the 3-month impact. The following table summarizes the effect of adopting EITF 03-11 on each quarter of the fiscal year ended March 31, 2004, which was all recorded in the first quarter of the calendar year (fourth quarter of the fiscal year). Adoption of EITF No. 03-11 had no impact on PacifiCorp's Net income.

NOTES TO FINANCIAL STATEMENTS (Continued)						

PacifiCorp (Electric Utility Only) Notes to the Electric Utility Only Financial Statements (Unaudited)

Note 1 - Basis of Presentation and Summary of Significant Accounting Policies

These financial statements are prepared in accordance with the requirements of the Federal Energy Regulatory Commission ("the FERC") as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a comprehensive basis of accounting other than generally accepted accounting principles. These notes include specific information requested by the FERC. See PacifiCorp's Securities and Exchange Commission (the "SEC") Annual Report on Form 10-K as of, and for the year ended, March 31, 2005 for financial statements and complete footnotes prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). PacifiCorp has a fiscal year end as of March 31.

The following are some of the significant differences between FERC reporting standards and GAAP:

Investments in Subsidiaries

Under FERC reporting standards, PacifiCorp accounts for its investments in majority-owned subsidiaries using the equity method rather than consolidating the assets, liabilities, revenues and expenses of the subsidiaries as required by GAAP. GAAP requires that majority-owned subsidiaries and variable-interest entities for which a company is the primary beneficiary be consolidated in accordance with Statement of Financial Accounting Standards ("SFAS") No. 94, Consolidation of All Majority-Owned Subsidiaries and FASB Interpretation No. 46, Consolidation of Variable-Interest Entities, an interpretation of Accounting Research Bulletin No. 51. In general, the accounting for investments in majority-owned subsidiaries using the equity method rather than the consolidation method in accordance with GAAP has no effect on net income or retained earnings.

Accumulated Removal Costs

The accumulated net removal costs for PacifiCorp's regulated plant assets that do not meet the definition of an asset retirement obligation under SFAS No. 143, *Accounting for Asset Retirement Obligations*, are classified as a regulatory liability under GAAP and as accumulated depreciation under FERC.

Accumulated Deferred Income Taxes

Accumulated deferred income taxes are classified as current and non-current for GAAP, by presenting net current assets and liabilities separate from net non-current assets and liabilities on the balance sheet in accordance with SFAS No. 109, *Accounting for Income Taxes*. All such amounts are classified as gross non-current assets and gross non-current liabilities for FERC.

Unrealized Gains and Losses on Derivative Instruments

FERC requires that unrealized gains and losses on derivative instruments be classified gross on the income statement in accordance with FERC Order 627, Accounting and Reporting of Financial Instruments, Comprehensive Income, Derivatives and Hedging Activities. Unrealized gains on wholesale sales, purchased power and fuel are reported in Other Income and unrealized losses on wholesale sales, purchased power and fuel are reported in Other Income and Deductions. For GAAP reporting purposes, unrealized gains and losses on wholesale sales are reported in Revenues and unrealized gains and losses on purchased power and fuel are reported in Energy Costs.

Reclassifications

Certain reclassifications of balance sheet and income statement amounts have been made to assist in multi-jurisdictional ratemaking process and conform to internal policies. These reclassifications had no effect on net income.

These financial statements have been prepared using accounting policies consistent with those applied at March 31, 2005 in the supplemental FERC filing, except in relation to new accounting standards.

These notes to the financial statements for the twelve months ended December 31, 2005 and 2004 are presented in accordance with

partition to the same of the s

NOTES TO FINANCIAL STATEMENTS (Continued)					

SEC interim reporting requirements based on FERC accounting requirements which represent abbreviated notes included for the Company's interim periods. Full footnote disclosures are made in PacifiCorp's Supplement to the FERC Form 1, which represents the Company's SEC reporting fiscal year ended March 31, 2005.

Sale of PacifiCorp

On May 23, 2005, ScottishPower and PacifiCorp Holdings, Inc. ("PHI"), PacifiCorp's direct parent company, executed a Stock Purchase Agreement (the "Stock Purchase Agreement") providing for the sale of all PacifiCorp common stock to MidAmerican Energy Holdings Company ("MidAmerican") for a value of approximately \$9.4 billion, consisting of approximately \$5.1 billion in cash plus approximately \$4.3 billion in net debt and preferred stock, which will remain outstanding at PacifiCorp. MidAmerican is based in Des Moines, Iowa, and is a privately owned global provider of energy services.

The closing of the sale of PacifiCorp is subject to a number of conditions, including ScottishPower shareholder consent and regulatory notification and/or approvals from the Federal Energy Regulatory Commission (the "FERC"), the Department of Justice or the Federal Trade Commission, the Federal Communications Commission, the Nuclear Regulatory Commission and the public utility commissions in the states of Utah, Oregon, Wyoming, Washington, Idaho and California, as well as consents under existing third-party agreements. Pending satisfaction of the closing conditions, the Stock Purchase Agreement requires ScottishPower and PHI to cause PacifiCorp to operate its business in the ordinary course consistent with past business practice. The Stock Purchase Agreement also requires ScottishPower and PHI to obtain MidAmerican's prior approval to certain actions taken by PacifiCorp beyond limits specified in the Stock Purchase Agreement, including:

- borrowings or debt issuances;
- · capital expenditures;
- construction or acquisition of new generation, transmission or delivery facilities or systems, other than as budgeted or necessary to fulfill regulatory commitments;
- unbudgeted significant acquisitions or dispositions;
- modifications to material agreements with regulators:
- issuance or sale of any capital stock to any person, other than PHI in certain circumstances;
- adoption or amendment of employee benefit plans or material increases to employee compensation; and
- payment of dividends to PHI.

While the sale of PacifiCorp is pending and the Stock Purchase Agreement is in effect, ScottishPower and PHI have agreed to make common equity contributions to PacifiCorp of \$125.0 million at the end of each quarter in fiscal year 2006 and \$131.25 million at the end of each quarter in fiscal year 2007. If the sale is completed, MidAmerican will refund to PHI the amount of required fiscal year 2007 common equity contributions as an increase to the purchase price. As described in Note 7 – Common Shareholder's Equity, PHI has made the equity contributions required to date by the Stock Purchase Agreement.

Pursuant to the Stock Purchase Agreement, ScottishPower has agreed to cause PacifiCorp to not pay quarterly dividends to PHI in excess of \$214.8 million in the aggregate during fiscal year 2006 and \$242.3 million in the aggregate during fiscal year 2007. These restrictions will terminate upon either the close of the sale of PacifiCorp or the earlier termination of the Stock Purchase Agreement.

PacifiCorp is party to pre-existing agreements with affiliates of MidAmerican for certain gas transportation and steam purchase transactions. These transactions are not significant to PacifiCorp's Energy costs.

Pursuant to the Stock Purchase Agreement, upon the closing of PacifiCorp's sale to MidAmerican, PacifiCorp will settle outstanding intercompany liabilities with ScottishPower subsidiaries and transfer to certain of these affiliate entities the assets and liabilities associated with the participation of affiliate employees in benefit plans sponsored by PacifiCorp.

Cash and Cash Equivalents

For the purposes of these financial statements, PacifiCorp considers all liquid investments with maturities of three months or less, at the time of acquisition, to be cash equivalents. The following table is a reconciliation of the cash accounts on the Balance sheets to the Statement of cash flows:

FERC FORM NO. 1 (ED. 12-88)

Stock-Based Compensation

As permitted by Statements of Financial Accounting Standards ("SFAS") No. 123, Accounting for Stock-Based Compensation ("SFAS No. 123"), PacifiCorp accounts for its stock-based compensation arrangements, primarily employee stock options, under the intrinsic value recognition and measurement principles of Accounting Principles Board ("APB") Opinion No. 25, Accounting for Stock Issued to Employees ("APB No. 25"), and related interpretations in accounting for employee stock options issued to PacifiCorp employees. Under APB No. 25, because the exercise price of employee stock options equals the market price of the underlying stock on the date of grant, no compensation expense is recorded if the ultimate number of shares to be awarded is known at the date of the grant. All options are issued in ScottishPower American Depository Shares. Had PacifiCorp determined compensation cost based on the fair value at the grant date for all stock options vesting in each period under SFAS No. 123, PacifiCorp's net income would have been reduced to the pro forma amounts below:

	Twelve Months Ended		T	Twelve Months

New Accounting Standards

FSP SFAS No. 106-2

In May 2004, the Financial Accounting Standards Board (the "FASB") released FASB Staff Position ("FSP") SFAS No. 106-2, Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003 ("FSP SFAS No. 106-2"). FSP SFAS No. 106-2 provides guidance on the accounting for the effects of the Medicare Prescription Drug Improvement and Modernization Act of 2003 (the "Medicare Act"). The Medicare Act introduced a prescription drug benefit under Medicare, as well as a federal subsidy to sponsors of retiree health care plans that include prescription drug benefits. Employers that sponsor postretirement health care plans that offer prescription drug benefits must determine if their prescription drug benefits are actuarially equivalent to the drug benefit provided under Medicare Part D as of the date of enactment of the Medicare Act to be entitled to receive the subsidy. PacifiCorp determined that its prescription drug plan met the actuarial equivalence requirements and therefore calendar year 2004 results reflect such.

Subsequent to initial adoption, the Centers for Medicare and Medicaid Services released final regulations for implementing the Medicare Act. These regulations were issued on January 21, 2005, and provide guidance for making a determination of whether the benefits under a plan will meet the definition of actuarial equivalence. PacifiCorp expects these regulations to result in an additional

FERC FORM NO. 1 (ED. 12-88)

	(1) X An Original	(Mo, Da, Yr)			
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

decrease in the accumulated postretirement benefit obligation of approximately \$18.0 million and an additional decrease in the annual net periodic postretirement benefit cost of approximately \$2.5 million during the calendar year ending December 31, 2005.

SFAS No. 123R and SAB No. 107

In December 2004, the FASB issued SFAS No. 123R, Share-Based Payment ("SFAS No. 123R"), a revision of the originally issued SFAS No. 123. SFAS No. 123R establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. In March 2005, the SEC issued Staff Accounting Bulletin ("SAB") No. 107 ("SAB No. 107"), which provides additional guidance in applying the provisions of SFAS No. 123R. SFAS No. 123R requires that the cost resulting from all share-based payment transactions be recognized in the financial statements using the fair value method. The intrinsic value method of accounting established by APB No. 25 will no longer be allowed. SAB No. 107 describes the SEC Staff's guidance in determining the assumptions that underlie the fair value estimates and discusses the interaction of SFAS No. 123R with other existing SEC guidance.

In April 2005, the effective date of SFAS No. 123R was deferred until the beginning of the fiscal year that begins after June 15, 2005; however, early adoption is encouraged. A modified prospective application is required for new awards and for awards modified, repurchased or cancelled after the required effective date. The provisions of SAB No. 107 will be applied upon adoption of SFAS No. 123R.

Certain PacifiCorp employees receive awards under various ScottishPower share-based payment plans. Application to these awards of the fair value method required by SFAS No. 123R, as compared to the application of the intrinsic value method allowed under APB No. 25, is not expected to result in a material change to recorded compensation expense upon adoption of SFAS No. 123R.

FSP SFAS No. 109-1

In December 2004, the FASB issued FASB Staff Position ("FSP") SFAS No. 109-1, Application of FASB Statement No. 109, Accounting for Income Taxes, to the Tax Deduction on Qualified Production Activities Provided by the American Jobs Creation Act of 2004. The tax deduction addressed in FSP SFAS No. 109-1 will be treated as a "special deduction" as described in SFAS No. 109, Accounting for Income Taxes. As such, the special deduction has no effect on deferred tax assets and liabilities existing at the enactment date. Rather, the impact of this deduction will be reported in the period in which the deduction could be claimed on a separate return basis in accordance with PacifiCorp's accounting policy. This statement became effective upon issuance. PacifiCorp currently believes the effect of this statement on its financial position and results of operations is immaterial.

FIN 47

In March 2005, the FASB issued FASB Interpretation No. 47, Accounting for Conditional Asset Retirement Obligations – an Interpretation of FASB Statement No. 143 ("FIN 47"). FIN 47 clarifies that the term "conditional asset retirement obligation" as used in SFAS No. 143 refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional, even though uncertainty exists about the timing and/or method of settlement. FIN 47 clarifies that an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation when incurred if the liability's fair value can be reasonably estimated. FIN 47 is effective at the end of the fiscal year ending after December 15, 2005. PacifiCorp is currently evaluating the impact of adopting FIN 47 on its financial position and results of operations.

EITF No. 04-6

In March 2005, the Emerging Issues Task Force (the "EITF") issued EITF No. 04-6, Accounting for Stripping Costs Incurred during Production in the Mining Industry ("EITF No. 04-6"). EITF No. 04-6 requires that stripping costs incurred during the production phase of a mine are variable production costs that should be included in the costs of the inventory produced (that is, extracted) during the period that the stripping costs are incurred. EITF No. 04-6 is effective for all fiscal years beginning after December 15, 2005 and is expected to be adopted by PacifiCorp on April 1, 2006. While the Company is currently evaluating what impact this guidance will have on its financial statements, its adoption is not expected to have a material impact on PacifiCorp's financial position or results of operations.

Note 2 – Accounting for the Effects of Regulation

PacifiCorp records regulatory assets and liabilities based on management's assessment that it is probable that a cost will be recovered

Name of Respondent	This Report is:	Date of Report	Year/Period of Report			
·	(1) X An Original	(Mo, Da, Yr)]			
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4			
NOTES TO FINANCIAL STATEMENTS (Continued)						

(asset) or that an obligation has been incurred (liability) in accordance with the provisions of SFAS No. 71, Accounting for the Effects of Certain Types of Regulation. The final outcome, or additional regulatory actions, could change management's assessment in future periods.

PacifiCorp evaluates the recovery of all regulatory assets periodically and as events occur. The evaluation includes the probability of recovery, as well as changes in the regulatory environment. Regulatory and/or legislative actions in Utah, Oregon, Wyoming, Washington, Idaho and California may require PacifiCorp to record regulatory asset write-offs and charges for impairment of long-lived assets in future periods.

For a detailed view of PacifiCorp's regulatory assets and liabilities see page 232, Regulatory Assets and page 278, Regulatory Liabilities of this FERC Form 1.

Note 3 – Derivative Instruments

PacifiCorp's derivative instruments are recorded on the comparative Balance Sheets as assets or liabilities measured at estimated fair value, unless they qualify for certain exemptions permitted under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended. Changes in fair value of PacifiCorp's recorded derivative contracts are recognized immediately in the Statements of Income and Retained Earnings, except for contracts probable of recovery in rates based upon approval in states comprising substantially all of PacifiCorp's retail revenues. The net change in fair value for such contracts is deferred as either a regulatory asset or liability until realized. Unrealized gains and losses on derivative contracts held for trading purposes, are presented gross in Other income and Other income and Other income and deductions. Unrealized gains and losses from derivative contracts not held for trading purposes are presented gross in Other income and Other income and deductions.

Unrealized losses and (gains) on energy sales and purchase contracts are affected by fluctuations in forward market prices for electricity and natural gas. The following table summarizes the amount of pre-tax unrealized losses and (gains) included within the Statements of Income and Retained Earnings associated with changes in fair value of PacifiCorp's derivative contracts.

		Twelve Months Ended December 31,			
(Millions of dollars)	2005			2004	
Other Income:					
Miscellaneous Nonoperating Income (421)	\$	(368.9)	\$	(85.0)	
Other Income Deductions:					
Other Deductions (426.5)		326.2		78.8	
Total unrealized (gain) loss on derivative contracts	\$	(42.7)		(6.2)	

The following table summarizes the changes in fair value of PacifiCorp's derivative contracts executed for balancing system resources and load obligations (non-trading), and for taking advantage of arbitrage opportunities (trading) for the twelve months ended December 31, 2005, and the portion of those amounts that has been recognized as a regulatory net (liability) because the contracts are receiving recovery in retail rates.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
·	(1) <u>X</u> An Original	(Mo, Da, Yr)			
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

(M illions of dollars)		Net (Liability)	No	gulatory et asset oility)(c)
Fair value of contracts outstanding at December 31, 2004 Contracts realized or otherwise settled during the period	\$	(271.3) (34.3)	\$	277.9 35.1
Changes in fair values attributable to changes in valuation techniques and assumptions (a)		(52.7)		52.7
Other changes in fair values (b)		499.9		(458.0)
Fair value of contracts outstanding at December 31, 2005	_\$	141.6	_\$_	(92.3)

- (a) Effective March 31, 2005, PacifiCorp adjusted its estimate of the period covered by market quotes from three years to six years due to the increased availability of verifiable market quotations. This change had the effect of decreasing the fair value of non-trading contracts by \$52.7 million, offset by an increase in regulatory net assets of the same amount.
- (b) Other changes in fair values include the effects of changes in market prices, inflation rates and interest rates, including those based on models, on new and existing contracts.
- (c) Net unrealized losses (gains) related to derivative contracts included in rates are recorded as a regulatory net asset (liability).

Weather derivatives - PacifiCorp currently has a non-exchange traded streamflow weather derivative contract to reduce PacifiCorp's exposure to variability in weather conditions that affect hydroelectric generation. Under the agreement, PacifiCorp pays an annual premium in return for the right to make or receive payments if streamflow levels are above or below certain thresholds. PacifiCorp estimates and records an asset or liability corresponding to the total expected future cash flow under the contract in accordance with EITF No. 99-2, Accounting for Weather Derivatives. The net liability recorded for this contracts was zero at December 31, 2005 and \$1.7 million at December 31, 2004. PacifiCorp recognized a gain of \$9.4 million for the twelve months ended December 31, 2005 and a gain of \$2.9 million for the twelve months ended December 31, 2004.

Note 4 – Related-Party Transactions

There are no loans or advances between PacifiCorp and ScottishPower or between PacifiCorp and PHI. Loans or advances between PacifiCorp and ScottishPower or PHI generally require state regulatory approval. There are intercompany loan agreements that allow funds to be lent from PacifiCorp Group Holdings Company ("PGHC") to PacifiCorp, but loans from PacifiCorp to PGHC are prohibited. There are intercompany loan agreements that allow funds to be lent between PacifiCorp and Pacific Minerals, Inc. ("PMI"), a wholly owned subsidiary of PacifiCorp. PacifiCorp does not maintain a centralized cash or money pool. Therefore, funds of each company are not commingled with funds of any other company. Other affiliate transactions that PacifiCorp enters into are subject to certain approval and reporting requirements of the regulatory authorities.

The following tables detail PacifiCorp's transactions and balances with unconsolidated related parties:

(a) These receivables and expenses primarily represent costs associated with retention agreements and severance benefits reimbursable by Scottish Power UK plc ("SPUK"), an indirect subsidiary of ScottishPower, and amounts allocated to SPUK by PacifiCorp for administrative services provided under ScottishPower's affiliated interest cross-charge policy. In addition, PacifiCorp recharged to SPUK payroll

NOTES TO FINANCIAL STATEMENTS (Continued)								

costs and related benefits of PacifiCorp employees working on international assignment in the United Kingdom during each of the three and nine months ended December 31, 2005 and 2004.

- (b) Amounts shown pertain to activities of PacifiCorp with PHI and its subsidiaries. Expenses recharged reflect costs for support services to PHI and its subsidiaries.
- (c) Amounts shown reflect costs recharged for support services to PacifiCorp's subsidiaries.
- (d) Includes prepaid income taxes paid to PHI of \$41.9 million at December 31, 2004. PHI is the tax paying entity for PacifiCorp. Also includes expenses related to operating lease payments for the West Valley facility, located in Utah and owned by West Valley Leasing Company, LLC ("West Valley"). West Valley is a subsidiary of PPM Energy, Inc. ("PPM"), which is a subsidiary of PHI. Certain costs associated with the West Valley lease are prepaid on an annual basis. PacifiCorp recorded lease expense in the amount of \$17.0 and \$17.1 for the West Valley facility for the twelve months ended December 31, 2005 and 2004.
- (e) PacifiCorp began participating in a captive insurance program provided by Dornoch International Insurance Limited ("DIIL"), an indirect wholly owned consolidated subsidiary of ScottishPower, in May 2005. DIIL covers all or significant portions of the property damage and liability insurance deductibles in many of PacifiCorp's current policies, as well as overhead distribution and transmission line property damage. PacifiCorp has no equity interest in DIIL and has no obligation to contribute equity or loan funds to DIIL. Premium amounts are established to cover loss claims, administrative expenses and appropriate reserves, but otherwise DIIL is not operated to generate profits. Certain costs associated with the captive insurance program are prepaid.
- (f) These liabilities and expenses primarily represent amounts allocated to PacifiCorp by SPUK for administrative services received under the cross-charge policy. Cross-charges from SPUK to PacifiCorp amounted to \$14.4 million and \$12.6 for the twelve months ended December 31, 2005 and 2004. These costs were recorded in Operations and maintenance expense and Other income and deductions. SPUK also recharged PacifiCorp for payroll costs and related benefits of SPUK employees working on international assignments with PacifiCorp in the United States for the twelve months ended December 31, 2005 and 2004.
- (g) The amount shown is the current portion of federal and state income taxes for December 31, 2005 and state taxes for December 31, 2004 payable to PHI. PHI is the tax paying entity for PacifiCorp.
- (h) Amounts due to affiliates of \$8.9 million for December 31, 2005 primarily represents, \$1.6 million in short-term demand loans, \$7.3 million in coal purchases payable to PMI. Amounts due to affiliates of \$28.9 million for December 31, 2004 represents, \$20.5 million in short-term demand loans and \$8.4 million in coal purchases payable to PMI.
- (i) These revenues and the associated deposits relate to wheeling services billed to PPM, a subsidiary of PHI. PacifiCorp provides these services to PPM pursuant to PacifiCorp's FERC-approved open access transmission tariff, which requires PacifiCorp to make transmission services available on a non-discriminatory basis to all interested parties.
- (j) Represents coal purchase and extraction expenses of \$70.0 million and \$75.1 for the twelve months ended December 31, 2005 and 2004 from the Trapper and Bridger coal mines, as well as environmental services provided by PacifiCorp Environmental Remediation Company ("PERCO") of \$1.4 million and \$1.6 for the twelve months ended December 31, 2005 and 2004.
- (k) Represents interest on short-term demand loans made to PacifiCorp by PGHC, in accordance with regulatory authorization and interest on deposits from PPM. Interest rates on related-party transactions approximate the lender's short-term borrowing cost or cost of capital as required by the relevant regulatory approval or exemption.
- (1) Includes interest on short-term demand loans made to PacifiCorp by PMI

Note 5 - Financing Arrangements

During the twelve months ended December 31, 2005, PacifiCorp entered into three new standby letters of credit which totaled \$56.7 million at December 31, 2005.

During the twelve months ended December 31, 2005, PacifiCorp amended \$421.3 million of its existing committed standby bond purchase and letter of credit agreements, which provide credit enhancement and liquidity support for eight series of variable-rate pollution control revenue bond obligations. Changes included an exclusion of the acquisition of PacifiCorp by MidAmerican as an

Name of Respondent	This Report is:	Date of Report	Year/Period of Report				
	(1) X An Original	(Mo, Da, Yr)	· 1				
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4				
NOTES TO FINANCIAL STATEMENTS (Continued)							

event of default under the agreements.

In August 2005, PacifiCorp amended and restated its existing \$800.0 million committed bank revolving credit agreement. Changes included an increase to 65.0% in the covenant not to exceed a specified debt-to-capitalization percentage, extension of the termination date to August 29, 2010 and an exclusion of the acquisition of PacifiCorp by MidAmerican as an event of default under the agreement.

Note 6 – Long-Term Debt

In September 2005, the SEC declared effective PacifiCorp's shelf registration statement covering \$700.0 million of future first mortgage bond and unsecured debt issuances. PacifiCorp has not yet issued any of the securities covered by this registration statement.

In June 2005, PacifiCorp issued \$300.0 million of its 5.25% Series of First Mortgage Bonds due June 15, 2035. PacifiCorp used the proceeds for the reduction of short-term debt, including the short-term debt used in December 2004 to redeem its 8.625% Series of First Mortgage Bonds due December 13, 2024 totaling \$20.0 million.

During March 2005, the maturity dates were extended to December 1, 2020 for three series of variable-rate pollution-control revenue bonds totaling \$38.1 million.

PacifiCorp made interest payments, net of capitalized interest, of \$236.2 million for the twelve months ended December 31, 2005 and \$218.0 million for the twelve months ended December 31, 2004.

Note 7 - Common Shareholder's Equity

At December 31, 2005 PacifiCorp had \$3.6 million in Appropriated retained earnings - amortization reserve, federal. This is in accordance with the requirements of hydroelectric relicensing projects.

On December 30, 2005, PacifiCorp issued 11,627,907 shares of its common stock to its direct parent company, PHI, in consideration of the capital contribution of \$125.0 million in cash made by PHI on that date.

On September 30, 2005, PacifiCorp issued 11,617,101 shares of its common stock to its direct parent, PHI, in consideration of the capital contribution of \$125.0 million in cash made by PHI on that date.

On July 21, 2005, PacifiCorp issued 11,737,090 shares of its common stock to its direct parent, PHI, in consideration of the capital contribution of \$125.0 million in cash made by PHI on June 30, 2005.

Proceeds from each issuance were used for the reduction of short-term debt.

Note 8 – Commitments and Contingencies

PacifiCorp follows SFAS No. 5, Accounting for Contingencies, to determine accounting and disclosure requirements for contingencies. PacifiCorp operates in a highly regulated environment. Governmental bodies such as the FERC, the SEC, the Internal Revenue Service, the Department of Labor, the United States Environmental Protection Agency (the "EPA") and others have authority over various aspects of PacifiCorp's business operations and public reporting. Reserves are established when required, in management's judgment, and disclosures regarding litigation, assessments and creditworthiness of customers or counterparties, among others, are made when appropriate. The evaluation of these contingencies is performed by various specialists inside and outside of PacifiCorp.

Litigation

In May 2004, PacifiCorp was served with a complaint filed in the United States District Court for the District of Oregon by the Klamath Tribes of Oregon, individual Klamath Tribal members and the Klamath Claims Committee. The complaint generally alleges that PacifiCorp and its predecessors affected the Klamath Tribes' federal treaty rights to fish for salmon in the headwaters of the Klamath River in southern Oregon by building dams that blocked the passage of salmon upstream to the headwaters beginning in 1911. In September 2004, the Klamath Tribes filed their first amended complaint adding claims of damage to their treaty rights to fish for

PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4				
NOTES TO FINANCIAL STATEMENTS (Continued)							

sucker and steelhead in the headwaters of the Klamath River. The complaint seeks in excess of \$1.0 billion in compensatory and punitive damages. In July 2005, the District Court dismissed the case and in September 2005 denied the Klamath Tribes' request to reconsider the dismissal. In October 2005, the Klamath Tribes appealed the District Court's decision to the Ninth Circuit Court of Appeals and briefing is scheduled to be completed by March 2006. PacifiCorp believes the outcome of this proceeding will not have a material impact on its financial position, results of operations or liquidity.

In October 2005, PacifiCorp was added as a defendant to a lawsuit originally filed in February 2005 in state district court in Salt Lake City, Utah by USA Power, LLC and its affiliated companies, USA Power Partners, LLC and Spring Canyon, LLC (collectively, "USA Power"), against Utah attorney Jody L. Williams and the law firm Holme, Roberts & Owen, LLP, who represent PacifiCorp on various matters from time to time. USA Power is the developer of a planned generation project in Mona, Utah called Spring Canyon, which PacifiCorp, as part of its resource procurement process, at one time considered as an alternative to the Currant Creek Power Plant. USA Power's complaint alleges that PacifiCorp misappropriated confidential proprietary information in violation of Utah's Uniform Trade Secrets Act and accuses PacifiCorp of breach of contract and related claims. USA Power seeks \$250.0 million in damages, statutory doubling of damages for its trade secrets violation claim, punitive damages, costs and attorneys' fees. PacifiCorp believes it has a number of defenses and intends to vigorously oppose any claim of liability for the matters alleged by USA Power. Furthermore, PacifiCorp expects that the outcome of this proceeding will not have a material impact on its financial position, results of operations or liquidity.

In October 2005, the Utah Committee of Consumer Services (the "CCS"), a state utility consumer advocate, filed a request for agency action with the Utah Public Service Commission (the "UPSC"). The request seeks an order requiring PacifiCorp to return to Utah ratepayers certain monies collected in Utah rates for taxes, which the CCS alleges were improperly retained by PacifiCorp's parent company, PHI. The CCS has publicly announced it is seeking a refund of at least \$50.0 million to Utah ratepayers. In November 2005, PacifiCorp filed a response with the UPSC seeking dismissal of the request. In December 2005 that request was denied. PacifiCorp disagrees with, and intends to vigorously oppose, the claims made by the CCS. A procedural schedule to hear the matter has not been established.

In April 2004, PacifiCorp filed a complaint with the federal district court in Wyoming challenging the Wyoming Public Service Commission (the "WPSC") decision made in March 2003 to deny recovery of the Hunter No. 1 replacement power costs and certain deferred excess net power costs. The complaint was filed on the grounds that the decision violates federal law by denying PacifiCorp recovery in retail rates of its wholesale electricity and transmission costs incurred to serve Wyoming customers. The lawsuit seeks an injunction requiring the WPSC to pass through PacifiCorp's wholesale electricity and transmission costs in retail rates. In November 2004, the court denied the defendants' motion to dismiss the complaint. In January 2005, the defendants appealed the court's ruling on the motion to dismiss and requested a stay of the underlying litigation. The defendants' appeal on sovereign immunity grounds and a decision on the issue of whether the defendants' notice of appeal was timely are pending at the Tenth Circuit Court of Appeals. In February 2006, PacifiCorp and certain parties intervening in its pending Wyoming general rate case reached a settlement of the terms of PacifiCorp's general rate case request. PacifiCorp also agreed to dismiss its federal lawsuit challenging the WPSC decision, and the defendants agreed to dismiss their pending appeal, subject to final approval of the general rate case settlement.

From time to time, PacifiCorp is also a party to various other legal claims, actions, complaints and disputes, certain of which involve material amounts. PacifiCorp recorded \$7.1 million in reserves as of December 31, 2005 related to various outstanding legal actions and disputes, excluding those discussed below. PacifiCorp currently believes that disposition of these matters will not have a material adverse effect on PacifiCorp's financial position, results of operations or liquidity.

Environmental Issues

PacifiCorp is subject to numerous environmental laws, including the Federal Clean Air Act and various state air quality laws; the Endangered Species Act, particularly as it relates to certain endangered species of fish; the Comprehensive Environmental Response, Compensation and Liability Act, and similar state laws relating to environmental cleanups; the Resource Conservation and Recovery Act, and similar state laws relating to the storage and handling of hazardous materials; and the Clean Water Act, and similar state laws relating to water quality. These laws could potentially impact future operations. Contingencies identified at December 31, 2005 principally consist of air quality matters. Pending or proposed air regulations will require PacifiCorp to reduce its electricity plant emissions of sulfur dioxide, nitrogen oxides and other pollutants below current levels. These reductions will be required to address regional haze programs, mercury emissions regulations and possible re-interpretations and changes to the federal Clean Air Act. In the future, PacifiCorp expects to incur significant costs to comply with various stricter air emissions requirements. These potential costs

Name of Respondent	This Report is:	Date of Report	Year/Period of Report				
·	(1) <u>X</u> An Original	(Mo, Da, Yr)	1				
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4				
NOTES TO FINANCIAL STATEMENTS (Continued)							

are expected to consist primarily of capital expenditures. PacifiCorp expects these costs would be included in rates and, as such, would not have a material adverse impact on PacifiCorp's financial position or results of operations.

Hydroelectric Relicensing

PacifiCorp's hydroelectric portfolio consists of 51 plants with an aggregate plant net capability of 1,159.4 MW. The FERC regulates 99.0% of the installed capacity through 18 individual licenses. Several of PacifiCorp's hydroelectric projects are in some stage of relicensing under the Federal Power Act. Hydroelectric relicensing and the related environmental compliance requirements are subject to uncertainties. PacifiCorp expects that future costs relating to these matters may be significant and consist primarily of additional relicensing costs, operations and maintenance expense and capital expenditures. Electricity generation reductions may result from the additional environmental requirements. PacifiCorp has accumulated approximately \$67.3 million in costs as of December 31, 2005 for ongoing hydroelectric relicensing that are reflected in assets on the Balance Sheet. PacifiCorp expects that these and future costs will be included in rates and, as such, will not have a material adverse impact on PacifiCorp's financial position or results of operations.

In October 2005, the new FERC license for the North Umpqua hydroelectric project became final under the terms of the North Umpqua Settlement Agreement. Prior to this date, the license had been effective, but not final, because environmental groups had challenged its legality before the FERC and in federal court. In September 2005, the Ninth Circuit Court of Appeals issued an order upholding the new license. Since the Court's order was not appealed within the allowed time, all legal challenges of the FERC license order have been exhausted and the license is final for purposes of recording liabilities. PacifiCorp is committed, over the 35-year life of the license, to fund approximately \$47.5 million for environmental mitigation and enhancement projects. As a result of the license becoming final, PacifiCorp recorded additional liabilities and intangible assets in October 2005 amounting to a present value of \$11.2 million. At December 31, 2005, the liability recorded for all North Umpqua obligations amounted to a present value of \$22.9 million.

Enron Corp. Reserves

In December 2001, Enron Corp. declared bankruptcy and defaulted on certain wholesale contracts. PacifiCorp had fully reserved for its \$8.0 million Enron Corp. receivable. PacifiCorp sold its bankruptcy claim to a third party during the first quarter of calendar 2005 for proceeds of \$1.7 million.

FERC Issues

California Refund Case - PacifiCorp is a party to a FERC proceeding that is investigating potential refunds for energy transactions in the California Independent System Operator and the California Power Exchange markets during past periods of high energy prices. PacifiCorp has a reserve of \$17.7 million for these potential refunds. PacifiCorp's ultimate exposure to refunds is dependent upon any order issued by the FERC in this proceeding. In addition, beginning in summer 2000, California market conditions resulted in defaults of amounts due to PacifiCorp from certain counterparties resulting from transactions with the California Independent System Operator and California Power Exchange. PacifiCorp has reserved \$5.0 million for these receivables.

Northwest Refund Case - In June 2003, the FERC terminated its proceeding relating to the possibility of requiring refunds for wholesale spot-market bilateral sales in the Pacific Northwest between December 2000 and June 2001. The FERC concluded that ordering refunds would not be an appropriate resolution of the matter. In November 2003, the FERC issued its final order denying rehearing. Several market participants have filed petitions in the Ninth Circuit Court of Appeals for review of the FERC's final order. A decision from the Ninth Circuit Court of Appeals is not expected to have a significant impact on PacifiCorp's financial position or results of operations.

<u>Federal Power Act Section 206 Case</u> - In June 2003, the FERC issued a final order denying PacifiCorp's request for recovery of excessive prices charged under certain wholesale electricity purchases scheduled for delivery during summer 2002 and dismissing PacifiCorp's complaints, under Section 206 of the Federal Power Act, against five wholesale electricity suppliers. In July 2003, PacifiCorp filed its request for rehearing of the FERC's order, which request was granted in August 2003. The FERC issued its final order denying rehearing in November 2003. Also in November 2003, PacifiCorp filed a petition in the Ninth Circuit Court of Appeals for review of the FERC's final order denying recovery. Court briefs from interested parties were filed by March 2005. In August 2005, the Ninth Circuit Court of Appeals dismissed PacifiCorp's appeal. In September 2005, PacifiCorp filed a request for rehearing of the Ninth Circuit's decision. This request was denied by the Ninth Circuit in October 2005. PacifiCorp will not pursue further review of the case; therefore, the Ninth Circuit's dismissal is final.

FERC Show-Cause Orders - In May 2002, PacifiCorp, together with other California electricity market participants, responded to data

Name of Respondent	This Report is:	Date of Report	Year/Period of Report					
i .	(1) X An Original	(Mo, Da, Yr)						
PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4					
NOTES TO FINANCIAL STATEMENTS (Continued)								

requests from the FERC regarding trading practices connected with the electricity crisis during 2000 and 2001. PacifiCorp confirmed that it did not engage in any trading practices intended to manipulate the market as described in the FERC's data requests issued in May 2002. In June 2003, the FERC ordered 60 companies (including PacifiCorp) to show cause why their behavior during the California energy crisis did not constitute manipulation of the wholesale electricity market, as defined in the California Independent System Operator and the California Power Exchange tariffs. In setting the cases for hearing, the FERC directed the administrative law judge to hear evidence and render findings and conclusions quantifying the extent of any unjust enrichment that resulted and to recommend monetary or other appropriate remedies. In August 2003, PacifiCorp and the FERC staff reached a resolution on the show-cause order. Under the terms of the settlement agreement, PacifiCorp denied liability and agreed to pay a nominal amount of \$67,745 in exchange for complete and total resolution of the issues raised in the FERC's show-cause order relating to PacifiCorp. In March 2004, the FERC issued its final order approving the settlement and terminating the docket. In April 2004, certain market participants filed requests for rehearing of the FERC's final order. A decision from the FERC on the rehearing request is pending.

FERC Market Power Analysis - Pursuant to the FERC's orders granting PacifiCorp authority to sell capacity and energy at market-based rates, PacifiCorp and certain of its affiliates are required to submit a joint market power analysis every three years. Under the FERC's current policy, applicants must demonstrate that they do not possess market power in order to charge market-based rates for sales of wholesale energy and capacity in the applicants' control areas. An analysis demonstrating an applicant's passage of certain threshold screens for assessing generation market power establishes a rebuttable presumption that the applicant does not possess generation market power, while failure to pass any screen creates a rebuttable presumption that the applicant has generation market power. In February 2005, PacifiCorp submitted a joint triennial market power analysis in compliance with the FERC's requirements. The analysis indicated that PacifiCorp failed to pass one of the generation market power screens in PacifiCorp's eastern control area and in Idaho Power Company's control area. In May 2005, the FERC issued an order instituting a proceeding pursuant to Section 206 of the Federal Power Act to determine whether PacifiCorp may continue to charge market-based rates for sales of wholesale energy and capacity in its east control area. Under the terms of the order, PacifiCorp and its affiliated co-applicants were required to submit additional information and analysis to the FERC within 60 days to rebut the presumption that PacifiCorp has generation market power. In June and July 2005, PacifiCorp filed additional analysis in response to the FERC's May 2005 order. In January 2006, the FERC requested PacifiCorp to amend its previous filings with additional analysis. If the FERC ultimately finds that PacifiCorp has market power, PacifiCorp will be required to implement measures to mitigate any exercise of market power, which may result in decreased revenues and/or increased operating expenses. PacifiCorp believes the outcome of this proceeding will not have a material impact on its financial position or results of operations.

Note 9 - Retirement Benefit Plans

The components of net periodic benefit cost for the twelve months ended December 31, 2005 and 2004 are as follows:

	Retirement Plans		Oth	er Postretir	ement I	Benefits		
(M illions of dollars)	M ont	welve ths Ended ember 31, 2005	M ont	welve hs Ended mber 31,	M ont	welve hs Ended mber 31,	M ont	welve hs Ended mber 31,

PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4				
NOTES TO FINANCIAL STATEMENTS (Continued)							

five-year period beginning in the first year in which they occur.

Employer Contributions

PacifiCorp contributed \$63.7 million to its retirement plans and \$25.2 million to its other postretirement plans during the twelve months ended December 31, 2005.

Note 10 - Income Taxes

PacifiCorp uses an estimated annual effective tax rate for computing the provision for income taxes on an interim basis.

PacifiCorp accrued federal and state income tax expense of \$185.1 million and \$122.8 million for the twelve months ended December 31, 2005 and December 31, 2004. PacifiCorp keeps its accounting records on a fiscal-year basis for SEC financial reporting purposes. The fiscal year end is March 31st. Annual fiscal year-end tax adjustments are performed in March. These adjustments generally result in larger changes to various tax accounts between "current-year end of quarter balances" and "prior year end balances" in the first quarter 3-Q (first quarter of the calendar year) report than in subsequent quarters.

The total accrued federal and state income tax expense are as follows:

(M illi	ons of	dollars)	M on	welve ths Ended cember,	M on	welve ths Ended cember,
Page	Line	Description		2005		2004
114	15	Income Taxes Federal 409.1	\$	95.8	\$	45.2
114	16	Income Taxes Other 409.1		7.9		(12.3)
114	17	Provision for Deferred Income Taxes 410.1		690.4		715.7
114	18	(Less) Provision for Deferred Income Taxes 411.1		623.9		625.1
114	19	Investment Tax Credit 411.4		(5.9)		(5.9)
117	53	Income Taxes Federal 409.2		20.4		7.9
117	54	Income Taxes Other 409.2		2.1		1.1
117	55	Provision for Deferred Income Taxes 410.2		1.3		0.5
117	56	(Less) Provision for Deferred Income Taxes 411.2		0.9		2.2
117	57	Investment Tax Credit 411.5		-		-
117	58	(Less) Investment Tax Credits 420		2.1		2.1
			\$	185.1	\$	122.8

PacifiCorp has established, and periodically reviews, an estimated contingent tax reserve on Balance Sheets to provide for the possibility of adverse outcomes in tax proceedings. The current-year accruals are primarily attributable to new issues identified for the tax years ended after March 31, 2000. PacifiCorp anticipates that final settlement and payment on settled issues and other unresolved issues will not have a material adverse impact on its financial position or results of operations.

PacifiCorp made net income tax payments of \$86.1 million for the twelve months ended December 31, 2005 and \$89.5 million for the twelve months ended December 31, 2004. The income tax payments include payments for current federal and state income taxes, as well as amounts paid in settlement of prior years' liabilities as a result of income tax proceedings.

Note 11 – Subsequent Events

On January 27, 2006, PacifiCorp's Board of Directors declared a dividend on common stock of \$0.163 per share totaling \$56.6 million

PacifiCorp and six other minority owners sold their interest in the 1 MW Skookumchuck Hydroelectric project to a subsidiary of Alberta Canada based TransAlta for \$7.4 million. PacifiCorp's share was \$3.5 million. The sale was completed on October 5, 2004, with the proceeds, net book value, and selling costs transferred to account 102, Electric plant purchased or sold. Additional closing costs were booked in December 2004 and cleared to account 102. A letter to the Federal Energy Regulatory Commission (the "FERC") for permission to clear account 102, Electric plant purchased or sold was approved on May 10, 2005 Docket No. AC05-43-000

PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4
	FOOTNOTE DATA		

Schedule Page: 224 Line No.: 15 Column: e

Equity earnings from Pacific Minerals, Inc. (PMI) consist of inter-company profit on coal sales from Bridger Coal Company, which PMI jointly owns with Idaho Power Company, to PacifiCorp and are not recorded in account 418.1, Equity in Earnings of Subsidiary Companies. In order to eliminate the inter-company profit on the coal sales, PacifiCorp records PMI's earnings as an offset to fuel expense.

This represents the fair value of stock options granted by ScottishPower for which certain performance measures were met in March 2005. These options became fully vested in May 2005. Prior year balance of \$59,808 was a June 2004 dividend that is now reflected as return of capital instead of a capital contribution.

F	OOTNOTE DATA		

Schedule Page: 256 Line No.: 27 Column: a

On June 13, 2005, PacifiCorp issued \$300.0 million of its 5.25% Series of First Mortgage Bonds due June 15, 2035. Authorizations for the issuance were as follows:

Oregon Public Utility Commission, Docket No. UF-4215, Order No. 05-258, dated May 9, 2005.

Washington Utilities and Transportation Commission, Docket No. UE-050556, Order No. 1, dated May 11, 2005.

Idaho Public Utilities Commission, Case No. PAC-E-05-5, Order No. 29787, dated May 17, 2005.

Schedule Page: 256.3 Line No.: 6 Column: a

On March 16, 2005, PacifiCorp extended the maturity date of the PCRB series to December 1, 2020.

Schedule Page: 256.3 Line No.: 7 Column: a

On March 16, 2005, PacifiCorp extended the maturity date of the PCRB series to December 1, 2020.

Schedule Page: 256.3 Line No.: 8 Column: a

On March 16, 2005, PacifiCorp extended the maturity date of the PCRB series to December 1, 2020.

Schedule Page: 256.4 Line No.: 2 Column: a

As of December 31, 2005, there were 450,000 shares outstanding (\$100 stated value per share) on the \$7.48 series subject to the following mandatory redemption requirements: 37,500 shares are subject to mandatory redemption on June 15, 2006, with all shares outstanding on June 15, 2007 subject to mandatory redemption on that date.

Schedule Page: 256.4 Line No.: 7 Column: a

Authorization for the issuance of long-term debt (\$1,000,000,000 authorized; \$700,000,000 available as of December 31, 2005) is as follows:

Oregon Public Utility Commission, Docket No. UF-4215, Order No. 05-258, dated May 9, 2005.

Idaho Public Utilities Commission, Case No. PAC-E-05-5, Order No. 29787, dated May 17, 2005.

Authorization for the issuance of long-term debt (\$400,000,000 authorized; \$100,000,000 available as of December 31, 2005) is as follows:

Washington Utilities and Transportation Commission, Docket No. UE-050556, Order No. 1 dated May 11, 2005.

Authorization for the issuance of pollution control revenue bonds (\$125,000,000 authorized; \$79,225,000 available as of December 31, 2005) is as follows:

Oregon Public Utility Commission, Docket No. UF-4128, Order No. 95-518, dated May 25, 1995.

Washington Utilities and Transportation Commission, Docket No. UE-950490, dated May 24, 1995.

Idaho Public Utilities Commission, Docket No. PAC-S-95-2, Order No. 26039, dated June 13, 1995.

	FOOTNOTE DATA		

Schedule Page: 300 Line No.: 11 Column: c

In July 2003, the Emerging Issues Task Force ("EITF") issued EITF No. 03-11. Effective January 1, 2004, PacifiCorp adopted EITF No. 03-11, which provides guidance on whether to report realized gains or losses on physically settled derivative contracts not held for trading purposes on a gross or net basis and requires realized gains or losses on derivative contracts that do not settle physically to be reported on a net basis. The adoption of EITF No. 03-11 resulted in PacifiCorp's netting certain contracts that were previously recorded on a gross basis, which reduced Sales for Resale and Purchased Power. Since PacifiCorp has a fiscal year end of March 31, the implementation of EITF 03-11 resulted in a reclassification of \$397.7 million at March 31, 2004 for the fiscal year then ended (first quarter of the calendar year). Consequently, since FERC reporting is based on a calendar year, the financial information reported in the following accounts contains the impact of the adjustment for the 12-month period ending March 31, 2004 as opposed to just the 3-month impact. The following table summarizes the effect of adopting EITF 03-11 on each quarter of the fiscal year ended March 31, 2004, which was all recorded in the first quarter of the calendar year (fourth quarter of the fiscal year). Adoption of EITF No. 03-11 had no impact on PacifiCorp's Net income.

Name of Respondent PacifiCorp	This Report Is: (1) X An Original (2) A Resubmission	Date of Report (Mo, Da, Yr) 03/20/2006	Year/Period of Report End of 2005/Q4			
SALES FOR RESALE (Account 447)						

- 1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
- 2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- 3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows: RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
- IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
- SF for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
- LU for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
- IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

	SALES FOR RESALE (Account 447)	(Continued)	
	tegory only for those services which cannot be Length of the contract and service from design		

of the service in a footnote.

AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

- 4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)
- 5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
- 6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP)

demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.

- 7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
- 8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (i). Explain in a footnote all components of the amount shown in column (i). Report in column (k) the total charge shown on bills rendered to the purchaser.
- 9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401.iine 24.
- 10. Footnote entries as required and provide explanations following all required data.

	SALES FOR RESALE (Account	447)	
power exchanges during the year.	sales to purchasers other than ultimate consum Do not report exchanges of electricity (i.e., tra	ansactions involving a ba	lancing of debits and credits

- for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
- 2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- 3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows: RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
- IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
- SF for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
- LU for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
- IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

	SALES FOR RESALE (Account 44	7)	

- 1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
- 2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- 3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows: RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
- IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
- SF for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
- LU for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
- IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

SALES FOR RESALE (Account 447) (Continued)

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all

Date of Report (Mo, Da, Yr)

03/20/2006

Year/Period of Report

End of

2005/Q4

Name of Respondent

Name of Respondent PacifiCorp	This Report Is: (1) X An Original (2) A Resubmission	Date of Report (Mo, Da, Yr) 03/20/2006	Year/Period of Report End of2005/Q4
	SALES FOR RESALE (Account 44	47)	

- 1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
- 2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- 3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows: RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
- IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
- SF for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
- LU for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
- IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

Name of Respondent

Name of Respondent PacifiCorp	This Report Is: (1) X An Original (2) A Resubmission	Date of Report (Mo, Da, Yr) 03/20/2006	Year/Period of Report End of 2005/Q4
	SALES FOR RESALE (Account 44	7)	

- 1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
- Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- 3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows: RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
- IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
- SF for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
- LU for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
- IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

- 2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- 3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows: RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
- IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
- SF for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
- LU for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
- IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

Name of Respondent PacifiCorp	This Report Is: (1) ☑ An Original (2) ☐ A Resubmission	Date of Report (Mo, Da, Yr) 03/20/2006	Year/Period of Report End of 2005/Q4
	SALES FOR RESALE (Account 447)	(Continued)	
	tegory only for those services which cannot be		

- of the service in a footnote.
- AD for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
- 4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)
- 5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
- 6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP)
- demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
- 7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
- 8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
- 9. The data in column (q) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401.iine 24.
- 10. Footnote entries as required and provide explanations following all required data.

PacifiCorp	(2) _ A Resubmission	03/20/2006	2005/Q4
	FOOTNOTE DATA		

Schedule Page: 320 Line No.: 76 Column: c

In July 2003, the Emerging Issues Task Force ("EITF") issued EITF No. 03-11. Effective January 1, 2004, PacifiCorp adopted EITF No. 03-11, which provides guidance on whether to report realized gains or losses on physically settled derivative contracts not held for trading purposes on a gross or net basis and requires realized gains or losses on derivative contracts that do not settle physically to be reported on a net basis. The adoption of EITF No. 03-11 resulted in PacifiCorp's netting certain contracts that were previously recorded on a gross basis, which reduced Sales for Resale and Purchased Power. Since PacifiCorp has a fiscal year end of March 31, the implementation of EITF 03-11 resulted in a reclassification of \$397.7 million at March 31, 2004 for the fiscal year then ended (first quarter of the calendar year). Consequently, since FERC reporting is based on a calendar year, the financial information reported in the following accounts contains the impact of the adjustment for the 12-month period ending March 31, 2004 as opposed to just the 3-month impact. The following table summarizes the effect of adopting EITF 03-11 on each quarter of the fiscal year ended March 31, 2004, which was all recorded in the first quarter of the calendar year (fourth quarter of the fiscal year). Adoption of EITF No. 03-11 had no impact on PacifiCorp's Net income.

Schedule Page: 320 Line No.: 158 Column: b

The \$(31,743) in pension and benefit expense for the twelve months ending December 31, 2005 represents a reclassification of a December 31, 2004 entry in January 2005.

Pensions and benefits are charged to functional accounts, which is consistent to where labor is charged. The following table summarizes the pension and benefit expense that was charged to the functional accounts.

	Twelve Mo	nths l	Ended
	Decem	ber 3	1,

		PURCHA	(Including power excha	nges)				
			ny accounting adjustr djustment.	nents or "true-ups"	for service provided	in prior reporting	1	
years. Provide an explanation in a footnote for each adjustment. 4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided. 5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain. 6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange. 7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (ii). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (j) include credits or charges other than incremental
