An operator dialed call occurs when the person originating the call has the ability to dial all the digits necessary for call completion but instead asks the long distance operator to place the call. The operator dials the called number and the billing number. The operator dialed per call charge applies on lieu of the operator assisted per call charge.

The rates for the operator dialed per call charges in Section 4.1.1 or Section 4.1.2 of this Price List apply to: Station-to-Station calls when the caller has the ability to dial all the digits necessary for call completion but instead asks the long distance operator to place the call. The operator dialed per call charge will not be applied to: (T)

(C) Fully Automated

(D)

(D)

The fully automated rate applies if a call:

(T)

-placed by a party identified as disabled and as a result of that disability cannot complete the call and the caller requests operator assistance for call completion or

-cannot be completed by the caller due to equipment failure or trouble on the long distance network and the caller requests operator assistance for call completion.

SECTION 3 - DESCRIPTION OF SWITCHED SERVICES

3.1 Operator Toll Assistance Services (continued)

3.1.7 Application of Charges

- (A) There are two (2) rate elements which apply to Operator Toll Assistance Services, a usage charge and a per call charge. The rates for a particular call are determined by the level of automation used (operator dialed, operator assisted, or fully automated). (T)
(D)

For certain Operator Toll Assistance Service calls, usage rates also vary depending on whether the call is classified as residential or business. The business rate per minute applies when the call is billed to a telephone number presubscribed to the Company for a Business Service. The residential rate per minute applies when a call is billed to a telephone number presubscribed to the Company for a Residential Service.

(D)
|
(D)
